## INTRODUCTION

All organizations must plan if progress is to be made towards reaching an objective, and those agencies charged with directing the growth of a community are no exception. The interaction of factors causing the growth and development of an area requires careful planning as a prerequisite to orderly growth. Three basic reasons are often given for the need of planning:

1. To meet events which are expected to happen;
2. To accomplish desired objectives; and
3. To avoid unwanted conditions.

In 1985, the Florida Legislature enacted and the Governor signed into law the "Local Government Comprehensive Planning and Land Development Regulation Act." This legislation requires all local governments in Florida to revise and update the comprehensive plan for their respective jurisdictions in conformance with the provisions of the aforesaid Act and the accompanying minimum criteria for plan review and determination of plan compliance contained in Chapter 9J-5, Florida Administrative Code.

This comprehensive planning process involves essentially four basic steps:

1. The collection and analysis of pertinent data concerning the physical and socio-economic characteristics of the study area, which has been accomplished through the preparation of this Data and Analysis document, although not a part of the Comprehensive Plan in that it is not an adopted document with legal status, it serves to provide a foundation and basis for the formulation of the Comprehensive Plan;
2. The formulation of goals for future growth and development, which are contained within the Comprehensive Plan, entitled "Plan Element";
3. The development of objectives and policies guided by the goals, which are the essence of the Comprehensive Plan and are also contained within the Comprehensive Plan, entitled "Plan Element"; and
4. The implementation of the Comprehensive Plan which is accomplished through the preparation, adoption and enforcement of land development regulations as mandated by the above referenced Act, as well as, the construction of capital improvement projects identified within the Comprehensive Plan.

The initial planning time frame for this Comprehensive Plan is a five (5) year period of time. The Town shall evaluate its Comprehensive Plan every five years, and prepare those reports as may be required by Florida Statutes.

## GENERAL SETTING OF THE TOWN OF BROOKER

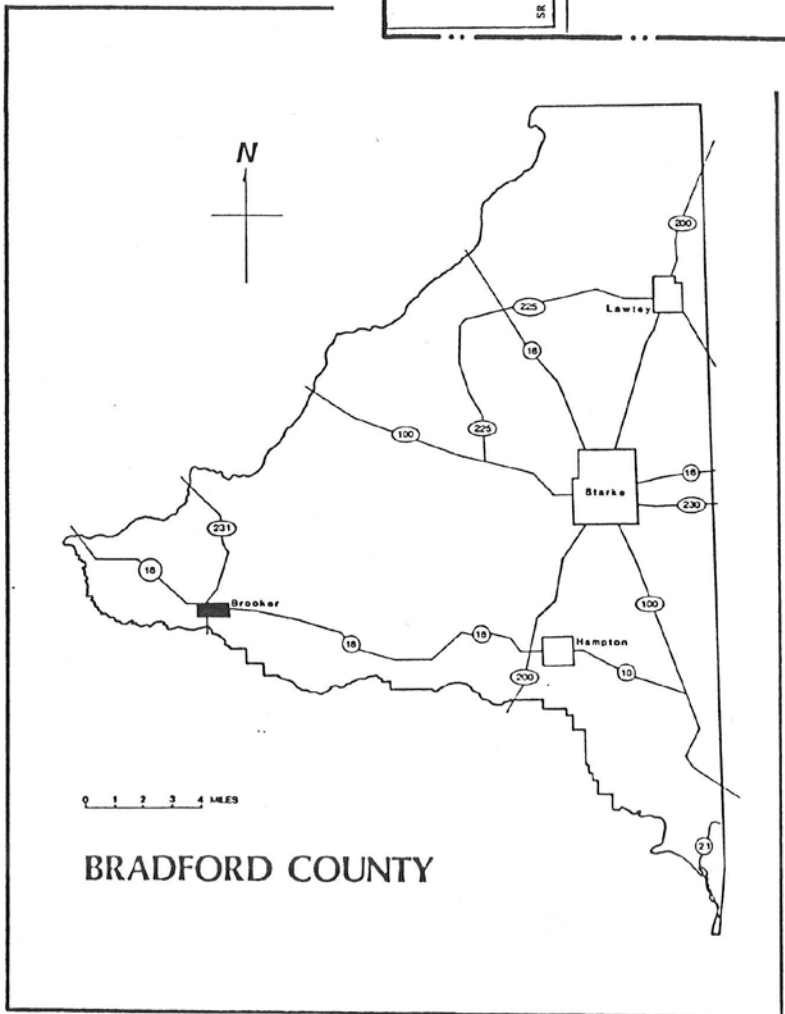

The Town of Brooker is approximately 0.50 square miles or 322 acres in area. The Town is located in the southwestern portion of Bradford County, as shown on the following location map.

The population of the Town was estimated at 432 persons in 1987, according to the University of Florida, Bureau of Economic and Business Research population estimated, adjusted for de-annexation by North Central Florida Regional Planning Council staff. This represents 1.8 percent of the County's total population.

## FUTURE LAND USE ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

**I**  
**FUTURE LAND USE ELEMENT**

**INTRODUCTION**

This Future Land Use Element and Future Land Use plan map and map series designates the future general distribution, location and extent of the uses of land within the incorporated areas of the Town. The purpose of this Future Land Use Element is to provide for the appropriate distribution of population densities and building and structural densities and intensities. The data collected for this plan element and analysis of this data, contained in the Town's Data and Analysis document, are not part of this plan element, but serve to provide a foundation and basis for the formulation of this portion of the Comprehensive plan.

The following goal, objectives and policies provide for distribution of future land use as well as guidance for such future land use. The focal point around which this Future Land Use Element is centered is the Town as a designated urban development area and the uses and density of such uses within this designated area. As the unincorporated areas of the County are primarily rural in character and use, there is an opportunity to provide appropriate direction for the future location and concentration of urban uses within the Town.

**FUTURE LAND USE GOAL, OBJECTIVES AND POLICIES**

**GOAL I - IN RECOGNITION OF THE IMPORTANCE OF ENHANCING THE QUALITY OF LIFE IN THE TOWN, DIRECT DEVELOPMENT TO THOSE AREAS WHICH HAVE IN PLACE, OR HAVE AGREEMENTS TO PROVIDE, SERVICE CAPACITY TO ACCOMMODATE GROWTH IN AN ENVIRONMENTALLY ACCEPTABLE MANNER.**

**OBJECTIVE I.1**     The Town shall make available or schedule for availability the public facilities for future growth and urban development as development occurs in order to provide for urban densities and intensities within the Town.

**Policy I.1.1**       The land development regulations of the Town shall limit the location of higher density residential, high intensity commercial and heavy industrial uses to areas adjacent to arterial or collector roads where public facilities are available to support such higher density or intensity.

**Policy I.1.2**       The land development regulations of the Town shall be based on and be consistent with the following standards for residential, agricultural, conservation, public uses (including educational uses, public buildings and facilities) and recreation, land use densities:

- |                    |                                                                                        |
|--------------------|----------------------------------------------------------------------------------------|
| Agriculture        | density less than or equal to 1 dwelling unit per 5 acres.                             |
| Residential low    | density of less than or equal to 2.0 dwelling units per acre;                          |
| Residential medium | density greater than 2.0 units but less than or equal to 8.0 dwelling units per acre;  |
| Residential high   | density greater than 8.0 units but less than or equal to 20.0 dwelling units per acre. |

Public, charter and private elementary and middle schools shall be permitted within the residential low density land use classification. Public, charter and private elementary, middle and high schools shall be permitted within residential medium density and residential high density land use classifications.

Policy I.1.3 The Town's land development regulation shall be based on and be consistent with the following standards for commercial, industrial, recreation, public use and conservation, land use densities:

Commercial or Industrial

The density and intensity of development for commercial or industrial uses shall conform to the current levels of intensity on adjacent properties, typically under a floor-area ratio (FAR) of 0.5; and

Public, charter and private elementary, middle and high schools shall be permitted within the commercial land use classification. Public, charter and private schools teaching industrial arts curriculum shall be permitted in industrial land use classification.

Recreation, Public Use and Conservation

The Town's land development regulations shall prohibit development of those areas designated Recreation, Public Use or Conservation. Structures reasonably required to directly service such uses shall be allowed however.

Policy I.1.4 The land development regulations of the Town shall allocate amounts and types of land uses for residential, commercial, industrial, public, and recreation to meet the needs of the existing and projected future populations and to locate urban land uses in a manner where public facilities may be provided to serve such urban land uses. (Urban land uses shall be herein defined as residential, commercial and industrial land use categories.)

Policy I.1.5 The land development regulations of the Town shall limit the designation of residential, commercial and industrial lands depicted on the Future Land Use Plan map to acreage which can be reasonably expected to develop by the year 2010.

Policy I.1.6 The land development regulations of the Town shall include a neighborhood commercial district to provide small scale retail and service establishments which will serve the convenience needs of a limited population or geographic area.

Policy I.1.7 The Town shall require the location of public, private and charter school sites to be consistent with the following criteria.

1. The proposed school location shall be compatible with present and projected use of adjacent property;
2. Adequate public facilities and services are, or will be available concurrent with the development of the school;
3. There are no significant environmental constraints that would preclude development of an educational facility on the site;
4. There will be no adverse impacts on archaeological or historic sites or structures listed on the State of Florida Historic Master Site File, which are located on that site;
5. The proposed location is well drained and soils are suitable for development or are adaptable for development and outdoor educational purposes with drainage improvements;
6. The proposed site can accommodate the required parking and circulation of vehicles on the site; and

7. Where feasible, the proposed site is so located to allow for co-location with parks, libraries and community centers.
- Policy I.1.8 The Town shall require the development of public, private and charter school sites to be consistent with the following standards.
1. Middle and high schools shall be located on collector or arterial roadways, as functionally classified within the Comprehensive Plan, which have sufficient capacity to carry traffic to be generated by the school and are suitable for high volume traffic during evening and special events as determined by generally acceptable traffic engineering standards;
  2. The location, arrangement and lighting of play fields and playgrounds shall be located and buffered as may be necessary to minimize impacts to adjacent residential property; and
  3. All structural setbacks, building heights, and access requirements shall be governed by the Town's land development regulations.
- OBJECTIVE I.2 The Town shall regulate the location of land development consistent with topography and soil conditions and the availability of facilities and services.
- Policy I.2.1 The land development regulations of the Town shall prohibit development within unsuitable areas due to flooding, improper drainage, steep slopes, rock formations and adverse earth formations, unless acceptable methods are formulated by the developer and approved by the Town to solve the problems created by the unsuitable land conditions and to protect the areas natural resources.
- OBJECTIVE I.3 The Town shall require that proposed development be approved only where the public facilities meet or exceed the adopted level of service standard.
- Policy I.3.1 The land development regulations of the Town shall establish procedures for the review of proposed development to determine its impact on level of service standards for public facilities. Building permits shall be issued only when the necessary facilities and services are in place in accordance with the Concurrency Management System found within this Comprehensive plan.
- OBJECTIVE I.4 The Town shall adopt innovative land development regulations to implement the Comprehensive Plan by the year 1992, to include such sections as planned development regulations.
- Policy I.4.1 The land development regulations of the Town shall contain specific and detailed provisions to manage future growth and development to implement the Comprehensive Plan which shall contain at a minimum the following provisions to:
1. Regulate the subdivision of land;
  2. Regulate the use of land and water consistent with this Element to maintain the compatibility of adjacent land uses and provide for open space;
  3. Protect environmentally sensitive lands identified within the Conservation Element;
  4. Regulate areas subject to seasonal and periodic flooding and provide for drainage and stormwater management;
  5. Protect potable water well fields and aquifer recharge areas;
  6. Regulate signage;

7. Provide safe and convenient on-site traffic flow and vehicle parking needs; and
8. Provide that development orders and permits shall not be issued which result in a reduction of the level of service standards adopted in this Comprehensive Plan.

OBJECTIVE I.5 The Town shall adopt utility policies by 1992, which shall limit the extension of public facility geographic service areas to the adjacent designated urban development area as defined within the County's Comprehensive Plan.

Policy I.5.1 The Town shall adopt as part of its utility policies and programs a provision whereby any extension of public facility geographic service areas into surrounding unincorporated areas, shall be limited to the adjacent designated urban development areas as defined within the Comprehensive Plan of the County.

Furthermore, prior to undertaking any such extension of public facility, the Town must determine that the proposed extension will maximize the use of existing facilities and will not encourage or promote urban sprawl.

OBJECTIVE 1.6 The land development regulations of the Town shall include within the portion regarding the report and recommendation of the Planning and Zoning Board on amendments to such regulations, that such report shall address whether the proposed amendment, will be a deterrent to the improvement or development of adjacent land uses and it shall be concluded by the local governing body, based upon such report and prior to approval of the amendment, that the granting of the amendment will not adversely impact adjacent land uses.

Policy I.6.1 The land development regulations of the Town shall require a special permit for mining and limit mining activity to those areas designated on the Future Land Use Plan map as agricultural.

Policy I.6.2 The land development regulations of the Town shall include provisions for drainage, stormwater management, open space and safe and convenient on-site traffic flow for all development.

Policy I.6.3 The land development regulations of the Town shall limit the intensity of development by requiring that the length of lots does not exceed three times the width of lots for the location of dwelling units.

Policy I.6.4 The Town shall participate in the National Flood Insurance Program and regulate development and the installation of utilities in flood hazard areas in conformance with the programs requirements.

Policy I.6.5 The land development regulations of the Town shall ensure that the natural functions of floodplains and flood prone areas are protected.

OBJECTIVE I.7 The Town shall identify and designate blighted areas which are feasible for redevelopment or renewal, through the updating of the housing condition survey with U.S. Bureau of Census information by 1993.

Policy I.7.1 The Town shall request federal and state funds to redevelop and renew any identified blighted areas, where the Town finds there is a competitive feasibility to receive such funding.

- OBJECTIVE I.8 The Town shall reduce inconsistencies in land uses with the provisions of this Comprehensive plan through the establishment of such inconsistencies as non-conforming land uses. Uses not consistent with this plan upon the plans adoption shall be non-conforming.
- Policy I.8.1 The land development regulations of the Town shall include definitions for nonconforming lots, uses of land, structures, characteristics of use and uses of structures and premises.
- OBJECTIVE I.9 The Town shall adopt historic resource preservation provisions by 1992.
- Policy I.9.1 The land development regulations of the Town shall establish criteria for designating historic structures and sites and further, establish guidelines for the maintenance and adaptive reuse of historic structures and sites.
- Policy I.9.2 The Town shall maintain a listing of all known prehistoric and historic sites within the Town. This list shall be updated as new information regarding the prehistoric or historic significance of a site is identified and provided to the Town by the state historical officer.
- OBJECTIVE I.10 The Town shall adopt regulations to protect natural resources and environmentally sensitive lands (including but not limited to wetlands and floodplains) by 1992.
- Policy I.10.1 The land development regulations of the Town shall include provisions for the protection of public potable water supply wells by limiting approval of land uses within the area designated by the land development regulations as a wellfield protection area.
- Policy 1.10.2 The Town's land development regulation shall prohibit development within a 200-foot radius of the public potable water supply. Development within the remaining wellfield protection area shall be regulated so as to prohibit those uses which may impose an adverse impact upon the public potable water supply.
- Policy 1.10.3 The Town's land development regulation shall include regulations designed to conserve, manage and. protect wetlands and environmentally sensitive areas from the impact and influence of development. No structure, other than docks, piers or walkways, shall be allowed in wetland.
- Policy I.10.4 The land development regulations of the Town shall include regulations which will mitigate the adverse effects of land uses on environmentally sensitive areas. In addition, the land development regulations shall prohibit the location of any structure, other than permitted docks, piers, or walkways within a wetland.
- OBJECTIVE I.11 The Town shall establish a process for coordination with agencies responsible for the implementation of any regional resource planning and management plan prepared pursuant to Chapter 380, Florida Statutes, by the year 1992.
- Policy I.11.1 The land development regulations of the Town shall require that all proposed development which is subject to the provisions of any regional resource planning and management plan shall be consistent with such plan and that proposed development be reviewed for such consistency during the development review process.
- OBJECTIVE I.12 The Town shall coordinate review of all proposed development plans, with the Water Management District, for developments proposed within the drainage basin of any designated priority water body to provide the Water Management District an opportunity to review such development to determine if the development is consistent with any approved management plans within that basin.

- Policy I.12.1        The land development regulations of the Town shall include a provision which requires the developer to submit development plans for all proposed development within the drainage basin of any designated priority water body shall be submitted to the Water Management District for review and comment as to the consistency of the proposed development with any approved management plans within such basin prior to development review by the Town.
- OBJECTIVE I.13    The land development regulations of the Town shall permit essential services by special exception in any zoning district, by 1992.
- Policy I.13.1        The land development regulations of the Town shall permit by special exception in any zoning district, except conservation areas, essential services, which are hereby defined to include and be limited to water, sewer, gas, solid waste disposal, telephone, televisions, radio, electrical systems (including transmission lines and substations) and telecommunications towers.

## II

### TRAFFIC CIRCULATION ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

## II

### TRAFFIC CIRCULATION ELEMENT

#### INTRODUCTION

A traffic circulation system which provides for the safe and efficient movement of people and goods is needed to support existing and future development. The purpose of this plan element is to identify the types, locations and extent of existing and proposed major thoroughfares and transportation routes in the Town and establish a framework for making policy decisions in planning for future transportation needs. The data collected for this plan element and analysis of this data, contained in the Data and Analysis document, are not part of this plan element, but serve to provide a foundation and basis for this portion of the Comprehensive plan.

The Traffic Circulation Element is closely related to the Future Land Use Element. This is due to the inherent two-way relationship between land use and transportation. Land use patterns directly affect the demand for transportation facilities, with more intensive land uses generating more traffic and requiring greater degrees of accessibility. Conversely, the transportation network affects land use in that access is provided by transportation facilities (existing or proposed) influences the use of land located adjacent to these facilities.

In addition to the Future Land Use Element, the Traffic Circulation Element is coordinated and consistent with the remaining plan elements as required by the Local Government Comprehensive Planning and Land Development Regulation Act and accompanying Chapter 9J-5, Florida Administrative Code. Further, the Town's traffic circulation system does not stop at political boundaries. Therefore, coordination between other local governments is a necessary prerequisite to a functional traffic circulation system. The goal, objectives and policies of the Intergovernmental Coordination Element establish guidelines to be followed which provide for coordination between various governmental entities.

The following goal, objectives and policies of this plan element are intended to serve as the plan for traffic circulation needs. The objectives and policies herein provide a basis for addressing transportation needs within the Town.

#### TRAFFIC CIRCULATION GOAL, OBJECTIVES AND POLICIES

**GOAL II - PROVIDE FOR A TRAFFIC CIRCULATION SYSTEM WHICH SERVES EXISTING AND FUTURE LAND USES.**

**OBJECTIVE II.1** The Town shall establish a safe, convenient and efficient level of service standard which shall be maintained for all motorized and non-motorized transportation systems.

**Policy II.1.1** Establish Level of Service standard at peak hour as defined within the Florida Department of Transportation "Florida Level of Service Standards and Guidelines Manual for Planning, 1989" for the following roadway segments within the Town:

ROADWAY SEGMENT NUMBER	ROADWAY SEGMENT	LEVEL OF SERVICE
1	S. R. 18 (from City's west limits to S.R. 235)	C
2	C.R. 18 (from S.R. 235 to City's east limits)	C
3	S.R. 235 (from City's north limits to City's south limits)	C

Policy II.1.2 The land development regulations of the Town shall include provisions to control the number and frequency of connections and access points of driveways and roads to arterial and collector roads, including minimal distance between access points and limiting the number of access points to parcel of land.

Policy II.1.3 The land development regulations of the Town shall require the provision of safe and convenient off street parking and loading standards, which includes the provision for non-motorized vehicle parking.

Policy II.1.4 The land development regulations of the Town shall, for any development which is required to provide a site plan or any development requiring platting, include requirements for additional right-of-way width for bicycle and pedestrian ways to be provided for all proposed collector and arterial roadways, as integrated or parallel transportation facilities.

OBJECTIVE II.2 The Town shall require that all traffic circulation improvements be consistent with and complement the future land uses on the future land use plan map.

Policy II.2.1 The Town shall, as part of the capital improvement scheduling of roadway improvements, review all proposed roadway improvements to determine if such improvement will further the direction of the future Land Use plan Element. Where the roadway is operated and maintained by another jurisdictional authority, the Town shall notify such jurisdiction, in writing, if any identified roadway improvement plans are not consistent with the provisions of the future land use plan element.

OBJECTIVE II.3 The Town shall coordinate all local comprehensive planning and land development activities with the Florida Department of Transportation for consistency with the 5-year Transportation Plan of the Department.

Policy II.3.1 The Town shall coordinate all local comprehensive planning and land development activities during the capital improvements planning process for roadway improvements, review the proposed roadway improvements which will be completed as part of the implementation of the Florida Department of Transportation 5-Year Transportation Plan so that such capital project planning is complementary and consistent with the state roadway improvement planning.

OBJECTIVE II.4 The Town shall provide for the protection of existing and future right-of-ways from building encroachment by establishing right-of-way setback requirements for all structures along new or realigned arterial roadways upon adoption of this plan.

Policy II.4.1 The Supplementary District Regulations found within the Town's land development regulations shall include the following provisions which require all structures along all new or realigned arterial roadways to provide additional setbacks for the future need of additional right-of-way. For new or realigned arterial roadways, the setback will be 150 feet.

1. All structures shall provide a minimum setback of one-hundred fifty (150) feet as measured from the centerline of the right-of-way for new or realigned arterial roads.
2. All structures shall provide a minimum setback of fifty (50) feet as measured from the centerline of right-of-way for collector roads.
3. All structures shall provide a minimum setback of fifty (50) feet as measured from the centerline of right-of-way for local roads.

THIS PAGE LEFT BLANK INTENTIONALLY

### III

## HOUSING ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

**III**  
**HOUSING ELEMENT**

**INTRODUCTION**

The following goal, objectives and policies constitute the Housing Element providing for decent, safe and sanitary housing at affordable costs and in sufficient quantities to meet the needs of both existing and future Town residents. The data collected for this plan element and analysis of this data contained in the Town's Data and Analysis document, are not part of this plan element, but serve to provide a foundation and basis for the formulation of this portion of the Comprehensive plan.

This plan element of the Town's Comprehensive Plan establishes a guide for the Town to follow in addressing the housing needs of the Town. The Housing Element addresses the main goal for housing within the Town through the year 2010, as well as, measurable objectives which are established to meet the housing goal of the Town. In addition, each objective is followed by one or more corresponding policies to provide guidance and direction towards the accomplishment of the objective.

**GOAL, OBJECTIVES AND POLICIES**

**GOAL III - PROVIDE DECENT, SAFE AND SANITARY HOUSING IN SUITABLE ENVIRONMENTS AT AFFORDABLE COSTS TO MEET THE NEEDS OF THE PRESENT AND FUTURE CITIZENS OF THE TOWN, INCLUDING THOSE RESIDENTS WITH SPECIAL NEEDS.**

**OBJECTIVE III.1** The Town shall provide the allocation of residential usage which can be reasonably expected to be developed by 2010 to assist the private sector in providing an affordable housing supply for the existing and anticipated population and for households with special housing needs.

**Policy III.1.1** The Town shall include as part of its adopted citizen participation plan a provision to ensure that representatives of the local private and non-profit housing industry be requested to participate in housing related planning activities conducted by the Town.

**Policy III.1.2** The land development regulations of the Town shall permit the construction of government subsidized housing only within areas which are served by public facilities which meet or exceed the adopted level of service standards established in the other elements of this Comprehensive Plan.

**OBJECTIVE III.2** The Town shall promote the maintenance of a safe and sanitary housing stock and the elimination of substandard housing conditions, as well as, the establishment of provisions for the structural and aesthetic improvement of housing through adoption of minimum housing standards. That housing stock not consistent with the requirements of section shall be deemed non-conforming. In addition, the Town shall implement a code enforcement process to implement/enforce the provisions of this plan.

**Policy III.2.1** The Town shall include minimum housing standards within the adopted land development regulations, which address the quality of housing and stabilization of neighborhoods. Those housing units which are substandard, or do not otherwise meet the minimal housing standards established by the Town shall be deemed non-conforming. In addition, the Town shall create and/or utilize a code enforcement board to enforce the provisions of this section.

**OBJECTIVE III.3** The Town shall ensure that adequate site exist for mobile homes and low and moderate income housing.

- Policy III.3.1 The Town, within the adopted citizen participation plan, shall request representatives of the private and non-profit housing industry to assist with the preparation of plans and programs for the development of housing for low and moderate-income persons.
- Policy III.3.2 The land development regulations of the Town shall provide for the location of manufactured housing developments and standards for manufactured housing installation. Manufactured homes will be allowed in all residential land uses.
- Policy III.3.3 The land development regulations of the Town insofar as they deal with manufactured housing shall be consistent with Section 320.825(5), Florida Statutes.
- OBJECTIVE III.4 The Town shall facilitate the provision of group homes or foster care facilities, as licensed or funded by the Florida Department of Health and Rehabilitative Services, within residential areas or areas of residential character.
- Policy III.4.1 The land development regulations of the Town shall establish standards for the location of foster care or group home facilities licensed or funded by the Florida Department of Health and Rehabilitative Services within residential areas as provided for in Chapter 419, Florida Statutes.
- Policy III.4.2 The land development regulations of the Town shall allow foster care facilities and smaller-sized group homes characterized by smaller populations and less intensive use in lower density residential areas, as a matter of right as is provided for in Chapter 419, Florida Statutes.
- Policy III.4.3 The land development regulations of the Town shall allow larger-sized group homes characterized by larger populations and more intensive use in higher density residential areas and/or the commercial areas subject to special review procedures to determine consistency with community locational requirements and appropriate safeguards.
- Policy III.4.4 The land development regulations of the Town shall contain standards which avoid concentrating group homes in order to maintain compatibility with the existing residential character of residential areas.
- OBJECTIVE III.5 The Town shall establish programs for the demolition of housing through the inclusion, by 1992, of hazardous buildings regulations within the unified land development regulations.
- Policy III.5.1 The Town shall include within the land development regulations a hazardous building code which shall require the rehabilitation or demolition of housing and other structures which pose a threat to public safety.
- Policy III.5.2 The Town shall apply for federal and state housing assistance where it has been determined that the Town has competitive standing in any ranking process for determining program award.
- Policy III.5.3 The Local Planning Agency shall develop neighborhood or sector plans to study and make recommendations to the Local Governing Body regarding the conservation of such neighborhoods, when existing residential neighborhoods are being considered for future land use amendments.
- OBJECTIVE III.6 The Town shall provide for the restoration or rehabilitation for adaptive reuse of historically significant housing through the adoption of regulations, which shall protect significant historic housing by the year 1992.

- Policy III.6.1 The Town shall include within the land development regulations provisions which protect significant historic housing through maintenance requirements and where appropriate, adaptive reuse.
- OBJECTIVE III.7 The Town shall treat persons displaced by governmental action on a uniform and equitable basis through the adoption in 1992 of the provisions contained within the Department of Housing and Urban Development Uniform Relocation Assistance and Real Property Acquisition Policies Act, as amended, found at 24 CFR Part II.
- Policy III.7.1 The Town's land development regulations shall contain provisions found within the "Uniform Act" cited in Objective III.7 above which shall require the location of persons displaced by governmental action within standard housing at affordable costs, prior to their displacement.
- OBJECTIVE III.8 The Town shall assist in the planning of the housing assistance programs of the Housing Authority by the year 1992.
- Policy III.8.1 The Town through the implementation of the Citizens Participation Plan shall provide assistance to the Housing Authority and the private sector to establish planning for the provision of a supply of housing to accommodate the full range of life stages and economic capabilities of the Town's residents.

### **SANITARY SEWER, SOLID WASTE, DRAINAGE, POTABLE WATER AND NATURAL GROUNDWATER AQUIFER RECHARGE ELEMENT**

#### INTRODUCTION

The following plan element provides direction for the use, maintenance and location of general sanitary sewer, solid waste, drainage, potable water facilities and natural groundwater aquifer recharge areas in conformance with the future land use element of this Comprehensive Plan. The data collected for this plan element and analysis of this data contained in the Town's Data and Analysis document, are not part of this plan element, but serve to provide a foundation and basis for the formulation of this portion of the Comprehensive Plan.

The future growth of the Town depends upon the safe, adequate and economical means for the provision of public facilities and services. This portion of the Comprehensive Plan provides a goal, objectives and policies which direct the implementation and use of such public facilities in a logical and economic fashion, as well as, in a manner which is consistent with the State of Florida Comprehensive Plan, the North Central Florida Regional Comprehensive Policy Plan and the various elements of this Comprehensive plan.

#### GOAL, OBJECTIVES AND POLICIES

**GOAL IV-1 - CAUSE THE PROVISION OF PUBLIC FACILITIES IN A TIMELY, ORDERLY AND EFFICIENT MANNER, WITH MINIMAL ADVERSE IMPACT ON NATURAL RESOURCES AND AT AN ACCEPTABLE LEVEL OF SERVICE FOR THE POPULATION OF THE TOWN.**

**OBJECTIVE IV.1** The Town, by 1992, shall correct existing deficiencies by undertaking capital improvement projects in accordance with the schedule contained in the Capital Improvements Element of this Comprehensive Plan. Further, said existing deficiencies shall be prioritized on the schedule in conformance with the criteria established in Policy VIII.1.1 of this Comprehensive Plan.

**Policy IV.1.1** The Town shall provide that within the schedule contained in the Capital Improvement Element, that capital improvement projects needed for replacement or correction of existing deficiencies be given priority over providing for future facilities needs, if they are imminently needed to protect the public health and safety and if existing facilities are not meeting maintenance or operation level of service standards adopted herein.

**OBJECTIVE IV.2** The Town shall meet future needs for facilities by scheduling the completion of public facilities improvements, such as the extension or increase of capacity of such facilities, concurrent with projected demand beginning in the year 1992.

#### POLICIES FOR SANITARY SEWER

**Policy IV.2.1** The Town hereby establishes the following level of service standards for sanitary sewer facilities:

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Community Sanitary Sewer System	Not Applicable

**Policy IV.2.2** The land development regulations of the Town shall contain provisions to prohibit the installation of septic tanks in locations with unsuitable soils or within wetland areas.

Policy IV.2.3 The land development regulations of the Town shall allow existing septic tanks and package wastewater treatment facilities to remain in service until such time as a centralized sanitary sewer service is available.

POLICIES FOR SOLID WASTE DISPOSAL

Policy IV.2.4 The Town hereby establishes the following level of service standards for solid waste disposal facilities:

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Solid Waste Landfill year	0.69 tons per capita per

POLICIES FOR DRAINAGE

Policy IV.2.5 The Town hereby establishes the following level of service standards for drainage facilities:

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Retention Pond	Standards as specified in Chapter 17-25 and 40B-4, Rules of the Florida Department of Environmental Regulation, Florida Administrative Code, as amended and Chapter 14-40.420, Florida Administrative Code, State Water Policy.

Policy IV.2.6 The land development regulations of the Town shall require the construction of roads within new plats or re-plats to be arranged so that the grades of the streets shall conform as closely as possible to the original topography to prevent the interruption of natural drainage flows, including sheet flow and flow to isolated wetland systems.

Policy IV.2.7 The land development regulations of the Town shall require a certification, by the preparer of the permit plans, that all construction activity undertaken shall incorporate erosion and sediment controls during construction.

POLICIES FOR POTABLE WATER

Policy IV.2.8 The Town hereby establishes the following level of service standards for potable water:

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Private Individual Water Wells	Not Applicable
Community Water Systems	93 gallons per capita per day

OBJECTIVE IV.3 In order to maximize the use of existing facilities and discourage urban sprawl, the Town shall require that urban uses shall be directed to areas which are served by public facilities. (Urban land uses shall be herein defined as residential, commercial and industrial land use categories.)

Policy IV.3.1 The land development regulations of the Town shall permit residential densities in excess of two (2) dwelling units per acre only where the community potable water system is available and accessible.

Policy IV.3.2 Unless and until the Town implements sanitary sewer system, densities in excess of three (3) dwelling units per acre shall not be permitted unless a package sewage disposal system is provided for.

- Policy IV.3.3 In the event the Town implements centralized sanitary sewer system, existing septic systems in urban areas shall be eliminated in accordance with the procedures set forth in Section 381.272(1), Florida Statutes.
- OBJECTIVE IV.4 The Town shall require that by 1992 no sanitary sewer facility have any discharged into designated prime groundwater aquifer recharge areas.
- Policy IV.4.1 The land development regulations of the Town shall provide that during the development review process all proposed development within the drainage basis of any designated priority water body shall be coordinated with the Water Management District and ensure that any proposed development is consistent with any approved management plans within that basin.
- OBJECTIVE IV.5 The Town shall coordinate with the Water Management District to protect the functions of natural groundwater recharge areas and natural drainage features, by requiring that all development proposals, which have the potential for impacting the water resources of the Town be reviewed by the Water Management District.
- Policy IV.5.1 The land development regulations of the Town shall provide for the limitation of development adjacent to natural drainage features to protect the functions of the feature including the provision of minimum buffers between development and natural drainage features to ensure their protection.
- Policy IV.5.2 The Town shall work with the Regional Water Management District to identify prime groundwater recharge areas.
- Policy IV.5.3 The land development regulations of the Town shall require that all proposed developments in flood prone areas provide for adequate drainage control, including but not limited to curb and gutter requirements, swales, retention ponds and stormwater recharge.
- Policy IV.5.4 The Town shall, by 1992 adopt regulations to control:
1. The use of septic tanks in prime groundwater recharge areas;
  2. To prohibit the storage or disposal of hazardous wastes in such areas; and
  3. Restrict or regulate the use of groundwater storage tanks in such areas.
- Policy IV.5.5 The land development regulations of the Town shall provide for the limitation of development and associated impervious surfaces in prime groundwater recharge areas designated by the Water Management District to protect the functions of the recharge area including, but not limited to, regulations restricting or regulating:
1. Septic tank usage;
  2. Storage of, disposal of hazardous wastes;
  3. The use and location of underground storage tanks; and
  4. Non-point source pollution.
- OBJECTIVE IV.6 The Town shall maximize the use of existing solid waste facility capacity by reducing the volume of solid waste to be disposed by thirty (30) percent.
- Policy IV.6.1 The Town shall coordinate its solid waste collection and disposal activities with the County and shall work with the County in reducing volume of solid waste to be disposed by thirty (30) percent.

- Policy IV.6.2      The Town shall participate in and coordinate with the County recycling program. The Town will actively encourage its residents to reduce the volume of solid waste to be disposed by recycling those items susceptible to recycling.
- OBJECTIVE IV.7    The Town shall require, by 1992, provision for the conservation of potable water sources.
- Policy IV.7.1      By 1992, the Town will identify opportunities to correct in-efficiencies and reduce per capita water demand.
- Policy IV.7.2      The Town shall continue to support and promote water conservation measures initiated by the Suwannee River Water Management Department.

V

CONSERVATION ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

## V

### CONSERVATION ELEMENT

#### INTRODUCTION

Conservation Element providing for the promotion of the conservation, use and protection of the Town's natural resources. The data collected for this plan element and analysis of this data, contained in the Town's Data and Analysis document, are not part of this plan element, but serve to provide a foundation and basis for the formulation of this portion of the Comprehensive Plan.

Conservation uses are defined as activities within land areas designated for the purpose of conserving or protecting natural resources or environmental quality and within this plan includes areas designated for such purposes as flood control, protection of quality or quantity of groundwater or surface water, floodplain management, or protection of vegetative communities or wildlife habitats.

The Future Land Use Plan Map addresses conservation future land use as defined above. The conservation future land use category shown on the Future Land Use Plan Map identifies future conservation areas which consist of land within the Town which is anticipated to have planned management of a natural resource to prevent exploitation, destruction or neglect of that natural resource. At present there are no areas which have planned management of a natural resource within the Town. Therefore, until such time as there are areas which conserve a natural resource through the use of best management programs, this category although listed, will not be shown on the Future Land Use Plan Map.

The Future Land Use Plan Map Series includes the identification of flood prone areas, wetlands, existent and planned waterwells, rivers, bays, lakes, minerals and soils, which are land cover features, but are not land uses. Therefore, although these natural resources are identified within the Future Land Use Plan Map Series, they are not designated on the Future Land Use Plan Map as conservation areas. However, the constraints on future land uses of these natural resources are addressed in the following goal, objectives and policy statements.

#### GOAL, OBJECTIVES AND POLICIES

**GOAL V - CONSERVE, THROUGH APPROPRIATE USE AND PROTECTION, THE RESOURCES OF THE TOWN TO MAINTAIN THE INTENSITY OF NATURAL FUNCTIONS.**

**OBJECTIVE V.1** The Town shall protect air quality through the appropriate siting of development and associated public facilities by requiring landscape buffers and setbacks to prevent wind shadows.

**Policy V.1.1** The land development regulations of the Town shall require that all appropriate air quality permits are obtained prior to the issuance of development orders, so that minimum air quality levels established by the Florida Department of Environmental Regulation are maintained in the Town.

**OBJECTIVE V.2** The Town shall adopt the Florida Division of Forestry best management practices to provide for the conservation, appropriate use and protection of the quality and quantity of current and projected water sources, water recharge areas and potable water wells.

**Policy V.2.1** The Town shall as part of the development review process require the coordination of development plans with the Florida Department of Environmental Regulation and the Water Management District to assist in monitoring uses which may impact the current and projected water sources of the Town.

- Policy V.2.2 The land development regulations of the Town shall prohibit uses within or adjacent to the water resources of the Town which would violate water quality anti-degradation rules established by the Florida Department of Environmental Regulation. For purposes of this section, water resources include lakes, rivers, creeks and public potable water wells.
- Policy V.2.3 The Town shall identify and make recommendations, where appropriate, for the purchase of environmentally sensitive lands under the Conservation and Recreation Lands Program or Save Our Rivers Program.
- Policy V.2.4 The land development regulations of the Town shall require a 35 foot natural buffer around all wetlands and prohibit the location of residential, commercial and industrial land uses within the buffer areas, but allow agriculture, silviculture and resource-based recreational activities within buffer areas subject to best management practices.
- Policy V.2.5 The Town shall, through the development review process, require that post-development runoff rates and pollutant loads do not exceed pre-development conditions.
- Policy V.2.6 The land development regulations of the Town shall require all new development to maintain the natural functions of environmentally sensitive areas, including but not limited to wetlands and 100-year floodplains so that the long term environmental integrity and economic and recreational value of these areas is maintained.
- Policy V.2.7 The land development regulations of the Town shall regulate development within 100-year floodplains in order to maintain the flood-carrying and flood storage capacities of the floodplains and reduce the risk of property damage and loss of life and to ensure that the natural function of flood plains are protected.
- Policy V.2.8 The land development regulations of the Town shall conserve wetlands through prohibiting any development or dredging and filling, which would significantly alter their natural functions and by only allowing non-intensive agricultural and silviculture operations consistent with the best management practices manual developed by the Florida Division of Forestry.
- Policy V.2.9 The Town shall support the Water Management District in their conducting of water conservation programs.
- Policy V.2.10 The Town shall comply with the plans of the Water Management District for the emergency conservation of water sources.
- Policy V.2.11 The land development regulations of the Town shall require a 35 foot regulated natural buffer adjacent to all perennial rivers, streams and creeks and prohibit the location of residential, commercial and industrial land uses within the buffer areas, but allow agriculture, silviculture, and resource-based recreational activities within buffer areas subject to best management practices.
- Policy V.2.12 The Town shall, as part of the development review process, limit development to low density and non-intensive uses including areas designated as conservation, recreation and open space, and public use in prime aquifer recharge areas, designated by the Water Management District, in order to maintain the natural features of these areas.

- Policy V.2.13 The Town shall, as part of the development review process, require the maintenance of the quantity and quality of surface water runoff within freshwater stream to sink watersheds by prohibiting any development which may diminish or degrade the quality and quantity of surfacewater runoff within the Town.
- Policy V.2.14 The Town, as part of the development review process, shall require that all hazardous waste generators properly manage their own wastes and require that new hazardous waste generators comply with all applicable federal and state permitting requirements before allowing any development plans.
- Policy V.2.15 The Town shall work with the Regional Water Management District to identify prime groundwater recharge areas. Once identified, the Town shall, if necessary, amend its comprehensive plan so as to identify the recharge areas and to establish corresponding objectives and policies for their protection.
- OBJECTIVE V.3 The Town shall require stream bank protection and woodland improvement provisions as best management practices for the conservation, appropriate use and protection of soils, minerals and native vegetative communities, including protection from destruction.
- Policy V.3.1 The Town shall require within the land development regulations that any mining permit be coordinated with the Florida Department of Natural Resources so that mineral resources are conserved and used appropriately.
- Policy V.3.2 The Town shall review topographic, hydrologic and vegetative cover factors during the development review process in order to protect and conserve the natural functions of soils.
- Policy V.3.3 The Town shall require within the development review process that multiple use of forest resources where appropriate be required to provide for recreation, wildlife habitat, watershed protection, erosion control and maintenance of water quality.
- Policy V.3.4 The Town shall require within the development review process the use of minimum open space ratios, establishment of wildlife corridors and the designation of conservation or preservation land uses as means by which to promote the protection and preservation of conservation areas.
- Policy V.3.5 The Town shall cooperate with adjacent local governments and other governmental entities, research and interest groups to conserve and protect, from destruction by development activities, unique vegetative communities located within the Town and adjacent local government jurisdictions.
- OBJECTIVE V.4 The Town shall implement best management practices for the conservation, appropriate use and protection of fisheries, wildlife and wildlife habitats including protection from destruction.
- Policy V.4.1 The Town shall cooperate with the Florida Game and Fresh Water Fish Commission in the monitoring and inventorying of wildlife and wildlife habitats within the Town.
- Policy V.4.2 The Town shall assist in the application and compliance with all Federal and State regulations which pertain to endangered and rare species.
- Policy V.4.3 The Town shall consult with the Florida Game and Fresh Water Fish Commission prior to the issuance of a development order where there is an indication that such issuance would result in an adverse impact to any endangered or rare species.

- Policy V.4.3(a) The Town shall, in consultation with the Game and Fresh Water Fish Commission, designate those species of wildlife or native vegetation that are endangered or rare. Prior to issuing a development permit, the Town shall require an inventory of the designated species at the site plan review process. The Town shall require site plan amendment or modification if necessary to preserve an endangered or rare species.
- Policy V.4.4 The Town shall cooperate with the Florida Department of Natural Resources in the inventorying and monitoring aquaculture activities within the Town.
- Policy V.4.5 The Town shall protect wetlands and avoid, when possible, adverse impacts on same by development. In the event development is permitted in or near environmentally sensitive areas, the Town shall address during the development review process the mitigation of development activities within environmentally sensitive areas so that the possible impacts created by the proposed development activity will not significantly alter the natural functions of these significant natural resources, especially the natural reservations identified in the recreation and open space element of this Comprehensive Plan.

# VI

## RECREATION AND OPEN SPACE ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

**VI**  
**RECREATION AND OPEN SPACE ELEMENT**

**INTRODUCTION**

Recreation is the pursuit of leisure time activities in an outdoor or indoor setting. The proper relationship in size, number, type and location of different park and recreation areas is the primary objective for achieving a well balanced recreation system. The policies included within this plan element for resource-based and user-oriented recreational facilities are based upon the information contained within the Town's Data and Analysis document. The data collected for this plan element and analysis of this data, contained in the Town's Data and Analysis document, are not part of this plan element, but serve to provide a foundation and basis for the formulation of this portion of the Comprehensive Plan.

The following goal, objectives and policies for resource-based and activity-based recreation facilities within the Town and surrounding environs establish guidelines for the proper relationship of size, number, type and location of the different park and recreation needs for the Town. The level of service standards established within the policies provide guidelines for determining the acceptable quantities of recreational resources and facilities for the population of the Town.

Within these level of service standard policies persons to be served is the population of the Town or the actual population demand upon the facility, whichever is greater; access points are any public or privately owned access which is available to the public at large; and the resource and user based facilities which are not listed are considered to be exceeding an appropriate level of service for such activity based upon the limited demand for the activity within the Town.

**GOAL, OBJECTIVES AND POLICIES**

**GOAL VI - SECURE THE PROVISION AND MAINTENANCE OF RECREATION FACILITIES AND OPEN SPACE FOR CITIZENS AND VISITORS AND ACCESS TO THESE FACILITIES FOR ALL PERSON, REGARDLESS OF SPECIAL NEED OR CONDITION.**

**OBJECTIVE VI.1** The Town shall provide vehicular and pedestrian access to Town owned activity and resource-based recreation facilities, by 1995.

**Policy VI.1.1** The Town shall establish provisions within the land development regulations which shall maintain the number of access points to water-oriented recreational resources for the Town which will meet or exceed the level of service standards, contained herein, for resource-based water related activities.

**OBJECTIVE VI.2** The Town, by 1992, shall maintain accurate recreation activity/facility inventories so that accurate levels of service can be determined, based upon the total public and private recreation resources available to the Town.

**Policy VI.2.1** The Town shall establish cooperative policies with other units of government, the Florida Department of Natural Resources, Water Management District, School Board and community organizations to meet recreation demands.

**OBJECTIVE VI.3** The Town shall establish requirements within the land development regulations, by 1992, to require new subdivisions or resubdivisions to allocate land, as determined by standards within the regulations, for parks and recreation facilities are provided in quantities to maintain the adopted level of service standards for recreation- contained herein.

**Policy VI.3.1** The Town hereby establishes the following level of service standards for resource based recreation facilities.

ACTIVITY	LEVEL OF SERVICE STANDARD
Swimming (non-pool)	1 access point at a beach, stream spring, rive, lake, or pond for every 25,000 persons to be served, within a 25 mile radius of the Town.
Fishing (non-boat)	1 access point within a 25 mile radius of the Town for every 4,300 persons to be served.
Camping (Recreation Vehicle and Tent)	1 acre of camp area within a 25 mile radius of the Town for every 5,600 persons to be served.
Picnicking	1 picnic table for every 500 persons to be served.
Bicycling	1 mile of local roadway for every 1,000 persons to be served.
Hiking	1 mile of available hiking trail within a 25 mile radius of the Town for every 7,000 persons to be served.
Nature Study	7 acres of managed conservation area within a 25 mile radius of the Town for every 2,500 persons to be served.

Policy VI.3.2 The Town hereby establishes the following level of service standards for user-based recreation facilities

ACTIVITY	LEVEL OF SERVICE STANDARD
Golf	1, 9-hole golf course for every 32,500 persons to be served.
Equipped Play Area	1 play area for every 1,000 persons to be served.
Tennis	1 tennis court for every 3,000 persons to be served.
Baseball/Softball	1 ball field for every 3,000 persons to be served.
Football/Soccer	1 multi-purpose playing field for every 15,000 persons to be served.
Handball/Racquetball	1 court for every 10,000 persons to be served.
Basketball	1 goal for every 1,000 persons to be served.
Swimming (pool)	1 pool for every 25,000 persons to be served.
Shuffleboard	1 court for every 10,000 persons to be served.

Policy VI.3.3 The Town shall through the annual capital improvements budgeting process, identify funding sources to correct or improve existing deficiencies in Town-owned parks and recreation facilities in accordance with the level of service standards contained herein.

OBJECTIVE VI.4 The Town shall establish provisions within the land development regulations, by 1992, which shall include requirements for the provisions and maintenance of open space by public agencies and private enterprise, where incompatible uses abut one another. For purposes of this section, incompatible uses are those in which the general use classification is changed. (i.e. residential, commercial, industrial.)

Policy VI.4.1 The Town's land development regulations shall include specific standards for the provision of open spaces by development or redevelopment.

Policy VI.4.2

The Town shall, as part of the procedure for monitoring and evaluation of the Comprehensive Plan, recommend lands for the purchase of open space by public agencies and subsequent to such land purchase, support such agencies in the management of such lands.

## VII

# INTERGOVERNMENTAL COORDINATION ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

## VII INTERGOVERNMENTAL COORDINATION ELEMENT

### INTRODUCTION

The purpose of this plan element is to establish a goal and planning objectives with corresponding policies for the coordination process and procedures with adjacent local governments, regional and state agencies.

The data collected for this plan element identifies the process of intergovernmental coordination. In addition, the corresponding analysis reviews the effectiveness of the intergovernmental coordination instruments which are in force to implement agreements for services between the Town and its governmental counterparts. Although the data and corresponding analysis are not part of this plan element, they serve to provide a basis for the formulation of this portion of the Comprehensive Plan.

The following goal, objectives and policies provide a plan which as implemented will provide guidelines for coordination between the Town and adjacent local governments and other governmental and service agencies.

### GOAL, OBJECTIVES AND POLICIES

**GOAL VII - ESTABLISH PROCESSES AMONG THE VARIOUS GOVERNMENTAL ENTITIES TO ACHIEVE COORDINATION OF COMPREHENSIVE PLANNING, PROMOTE COMPATIBLE DEVELOPMENT, PROVIDE PUBLIC SERVICES AND PROMOTE THE EFFICIENT USE OF AVAILABLE RESOURCES AMONG GOVERNMENTAL ENTITIES.**

**OBJECTIVE VII.1** The Town shall coordinate its comprehensive planning with the School Board, Water Management District, adjacent local government comprehensive plans and other units of local government providing services but not having regulatory authority over the use of the land, by 1992.

**Policy VII.1.1** The Town shall establish a procedure, as part of the Comprehensive Plan review and amendment process, that all plan amendments proposed within the Comprehensive Plan are coordinated with adjacent local governments, the School Board, Water Management District, Regional Planning Council, state and other units of local government providing services but not having regulatory authority over the use of land, the Regional Planning Council, and the state.

**Policy VII.1.2** The Town shall use the Regional Planning Council's informal mediation process to resolve conflicts with other units of government.

**Policy VII.1.3** The Town shall establish interlocal agreements for the provision of services across jurisdictional boundaries.

**Policy VII.1.4** The Town shall use the Regional Planning Council's informal mediation process to resolve annexation issues.

**Policy VII.1.5** The Town shall coordinate its comprehensive planning with the School Board pursuant to the Interlocal Agreement for Public School Facility Planning by reviewing and commenting on the Five-Year Facilities Work Program of the School Board annually; reviewing and commenting on the Educational Plant Survey of the School Board; providing growth and development trend reports to the School Board annually; reviewing and commenting on future school sites for consistency with the Comprehensive Plan; providing notification of Comprehensive Plan amendments, rezonings, and development proposals to the School Board; considering co-location and shared use opportunities for

community facilities with the School Board; providing applications for residential development to the School Board for a determination of whether there is adequate school capacity to accommodate the proposed residential development; and jointly evaluating with the School Board proportionate share mitigation options if school capacity is not available.

- OBJECTIVE VII.2 The Town shall provide adjacent units of local government, the Water Management District, the Regional Planning Council and the Florida Department of Community Affairs the opportunity to comment on Comprehensive Plan amendments, except small scale development amendments as required by Section 163.3187, Florida Statutes.
- Policy VII.2.1 The Town shall, as part of the development review process, review the relationship of proposed development to the existing comprehensive plans of adjacent local governments.
- Policy VII.2.2 The Town shall, as part of the monitoring and evaluation process of the Comprehensive Plan, review the relationships of development provided for in the Comprehensive Plan to the existing comprehensive plan of adjacent local governments.
- Policy VII.2.3 The Town's administrative officer shall provide information, as necessary, to assist adjacent units of local government manage growth within their respective jurisdictions.
- OBJECTIVE VII.3 The Town shall coordinate the establishment and amendment of level of service standards for public facilities with state and local entities having operational and maintenance responsibility for such facilities prior to the adoption or any amendment such adopted level of service standards.
- Policy VII.3.1 The Town, by 1992, shall, as part of the Comprehensive plan monitoring and evaluation process, coordinate amendments of any level of service standards with appropriate state, regional and local agencies, such as the Florida Department of Transportation, Florida Department of Environmental Regulation, Florida Department of Natural Resources, the Water Management District, the Regional Planning Council, adjacent local governments and the School Board prior to such amendment.
- OBJECTIVE VII.4 The Town shall ensure that the impacts of development proposed in the plans are coordinated with development in the county, region and state.
- Policy VII.4.1 The Town shall, as part of the development review process, review the relationship of proposed developments to the existing comprehensive plans of adjacent local governments.
- Policy VII.4.2 The Town shall adopt procedures whereby review and comment by adjacent governments will be obtained prior to the issuance of a development permit. The Town shall work towards the adoption of a reciprocal review process with adjacent governments.
- OBJECTIVE VII.5 The Town shall upon adoption of this objective, coordinate the Comprehensive Plan with the School Board Five-Year Facilities Plan.

- Policy VII.5.1           Until such time as interlocal agreement is adopted by the Town and the School Board in accordance with the requirement of Chapter 163, Part II and Chapter 235, Florida Statutes, the following procedure shall be used to ensure intergovernmental coordination with the School Board for the location of educational facilities within the Town:
1.    Upon receipt of a written notice from the School Board informing the Town of the acquisition or leasing of property to be used for new public educational facilities, the Town shall notify the School Board within 45 days as to the consistency of the site with the Comprehensive Plan; and
  2.    Subsequent to a request by the School Board for a comprehensive plan determination, the Town shall determine the consistency, with the Comprehensive Plan, of any proposed educational capital improvement projects.
- Policy VII.5.2           Until such time as an interlocal agreement is adopted by the Town and the School Board in accordance with the requirements of Chapter 163, Part II and Chapter 235, Florida Statutes, the following procedure shall govern the collaborative planning program and decision making concerning population projections and public school siting between the Town and the School Board:
1.    Upon receipt of the annual report specified in Chapter 235, Florida Statutes, whereby the School Board would notify the Town of any additions to the School Five-Year School Facilities Plan, the Town shall respond to the receipt of said plan in accordance with Policy VII.5.1 of the Comprehensive Plan; and
  2.    The Town shall coordinate population estimates and projections with the School Board at a minimum once each year as part of the review of the Five-Year School Facilities Plan.
- Policy VII.5.3           In order to address the extension of public facilities to existing or new schools, subject to concurrency, all expansions or new construction of public, charter and private schools shall be subject to site and development plan review and approval.
- Policy VII.5.4           In order to coordinate the effective and efficient provision and siting of educational facilities with associated infrastructure and services within the Town, representatives of the Town and the School Board shall meet by the end of the year 2000 to develop mechanisms for coordination of educational facilities planning.
- Policy VII.5.5           The Town shall focus on the following coordinating mechanisms when discussing the interlocal agreement, required by Chapter 163, Part II and Chapter 235, Florida Statutes, with the School Board:
1.    Coordinate the review of the annual update of the Capital Improvements Element of the Town and the annual educational facilities report and Five-Year School Facilities Plan of the School Board;
  2.    Coordinate the review and assessment of the associated costs and expenditures of siting and developing schools with needed public infrastructure;
  3.    Coordinate the review of land uses that increase residential density;

4. Use a unified data base, including population forecasts (student population), land use and facilities; and
5. Use recreational and physical plant facilities in a manner which fosters the coordination of use of the facilities consistent with their multi-function design.

OBJECTIVE VII.6 The Town shall provide all other units of local government located within the County, the opportunity to comment on the siting of facilities with countywide significance, including locally unwanted land uses.

Policy VII.6 The Town, as part of the development review process, shall review the relationship of any facilities with countywide significance, including locally unwanted land uses, to the existing comprehensive plans of all other units of local governments located within the County.

## VIII

### CAPITAL IMPROVEMENTS ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

**VIII**  
**CAPITAL IMPROVEMENTS ELEMENT**

**INTRODUCTION**

The following goal, objectives and policies for capital improvement provide strategic planning for the financing and construction of improvements identified as part of the capital improvements Data and Analysis document.

The data collected for this plan element and analysis of this data, contained in the Town's Data and Analysis document, are not part of this plan element, but serve to provide a foundation and basis for the formulation of this portion of the Comprehensive Plan.

This element is not intended to be a capital improvement program for the Town and therefore, considers only those public facilities which are planned for under the requirements of Chapter 163, Florida Statutes, Part II and Rule 9J-5, Florida Administrative Code, as amended.

**GOAL, OBJECTIVES AND POLICIES**

**GOAL VIII - THE TOWN SHALL ADOPT AND IMPLEMENT A CAPITAL IMPROVEMENTS PROGRAM WHICH COORDINATES THE TIMING AND PRIORITIES THE DELIVERY OF THE NEEDS ADDRESSED WITHIN THE OTHER ELEMENTS OF THIS COMPREHENSIVE PLAN.**

**OBJECTIVE VII.1** The Town shall provide capital improvements to correct the existing and projected deficiencies as identified within the schedule of improvements and funding of this plan element, by adopting an annual capital improvements budget in fiscal year 1991 and every year thereafter which is consistent with the schedule of improvements and funding.

**Policy VIII.1.1** The Town shall establish as part of the annual budgeting process the following criteria for the evaluation of proposed capital improvement projects:

Criteria:

1. The Town shall assess the level of service for the public facilities which have adopted level of service standards established by the comprehensive Plan, on an annual basis, prior to or concurrent with the budget process of the Town.
2. The Town shall schedule only those projects which are consistent with the goals, objectives and policies of this Comprehensive plan and which do not exceed the Town's fiscal capacity;
3. The Town shall identify those existing or projected public facility needs, which occur or are projected to occur, due to deficiencies in the maintenance of adopted levels of service standards;
4. The capital improvement projects identified which are imminently needed to protect the public health and safety shall be given the highest priority;
5. The capital improvements projects related to the maintenance and operation of existing facilities, which, due to existing or projected needs, do not or are not expected to meet the adopted level of service standard for such facility shall be given the second order of priority;

6. The capital improvement projects with the greatest deficiencies based upon the established level of service standards within the Comprehensive Plan shall be given the third order or priority;
7. The capital improvement projects, which due to deficiencies based upon the established level of service standard within the Comprehensive Plan, are needed to provide public facilities to areas which have received development approval prior to the adoption of this Comprehensive Plan shall be given the fourth order of priority; and
8. The locational needs of capital improvement projects based on actual and projected growth patterns, including areas of new development and re-development.

Policy VIII.1.2 The Town shall, upon identification of a need for drainage facility improvements due to deficiencies based upon the established level of service standards within the Comprehensive Plan, coordinate plans for improvements with the Water Management District prior to scheduling such drainage facility improvement.

Policy VIII.1.3 The Town shall review the effectiveness of the capital improvements planning program through the Procedure for Monitoring and Evaluation of the Capital Improvements Element, within this plan element.

OBJECTIVE VIII.2 The Town shall require by 1991 that all decisions regarding the issuance of development permits shall be consistent with the established level of service standards adopted for public facilities within the Comprehensive Plan.

Policy VIII.2.1 The Town shall use the following level of service standards in reviewing impacts of new development and redevelopment upon the provisions of public facilities:

**TRAFFIC CIRCULATION - LEVEL OF SERVICE STANDARDS:**

Establish Level of Service Standard at peak hour as defined within the Florida Department of Transportation "Florida Level of Service Standards and Guidelines Manual for Training, 1989" for the following roadway segments within the Town:

ROADWAY SEGMENT NUMBER	ROADWAY SEGMENT	LEVEL OF SERVICE
1	S. R. 18 (from City's west limits to S.R. 235)	C
2	C.R. 18 (from S.R. 235 to City's east limits)	C

**SANITARY SEWER LEVEL OF SERVICE STANDARDS**

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Community Sanitary Sewer System	Not Applicable

**SOLID WASTE DISPOSAL LEVEL OF SERVICE STANDARDS**

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Solid Waste Landfill	0.69 tons per capital per year

**DRAINAGE LEVEL OF SERVICE STANDARDS**

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Retention Pond	Standards as specified in Chapter 17-25 and 40B-4, Rules of the Florida Department of Environmental Regulation, Florida Administrative Code, as amended, and Chapter 17-40.420, Florida Administrative Code, State Water Policy.

**POTABLE WATER LEVEL OF SERVICE STANDARDS**

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Private Individual Water Wells	Not Applicable
Community Water Systems	93 gallons per capita per day

**RESOURCE BASED RECREATION ACTIVITY/FACILITY  
LEVEL OF SERVICE STANDARDS**

ACTIVITY	LEVEL OF SERVICE STANDARD
Swimming (non-pool)	1 access point at a beach, stream spring, rive, lake, or pond for every 25,000 persons to be served, within a 25 mile radius of the Town.
Fishing (non-boat)	1 access point within a 25 mile radius of the Town for every 4,300 persons to be served.
Camping (Recreation Vehicle and Tent)	1 acre of camp area within a 25 mile radius of the Town for every 5,600 persons to be served.
Picnicking	1 picnic table for every 500 persons to be served.
Bicycling	1 mile of local roadway for every 1,000 persons to be served.
Hiking	1 mile of available hiking trail within a 25 mile radius of the Town for every 7,000 persons to be served.
Nature Study	7 acres of managed conservation area within a 25 mile radius of the Town for every 2,500 persons to be served.

ACTIVITY BASED RECREATION ACTIVITY/FACILITY

LEVEL OF SERVICE STANDARDS

ACTIVITY	LEVEL OF SERVICE STANDARD
Golf	1, 9-hole golf course for every 32,500 persons to be served.
Equipped Play Area	1 play area for every 1,000 persons to be served.
Tennis	1 tennis court for every 3,000 persons to be served.
Baseball/Softball	1 ball field for every 3,000 persons to be served.
Football/Soccer	1 multi-purpose playing field for every 15,000 persons to be served.
Handball/Racquetball	1 court for every 10,000 persons to be served.
Basketball	1 goal for every 1,000 persons to be served.
Swimming (pool)	1 pool for every 25,000 persons to be served.
Shuffleboard	1 court for every 10,000 persons to be served.

PUBLIC SCHOOL FACILITIES LEVEL OF SERVICE STANDARD

ACTIVITY	LEVEL OF SERVICE STANDARD
Elementary	100 percent of permanent Florida Inventory of School Houses capacity as adjusted annually by the School Board to account for measurable programmatic changes.
Elementary/Middle	100 percent of permanent Florida Inventory of School Houses capacity as adjusted annually by the School Board to account for measurable programmatic changes.
Middle	100 percent of permanent Florida Inventory of School Houses capacity as adjusted annually by the School Board to account for measurable programmatic changes.
High School	100 percent of permanent Florida Inventory of School Houses capacity as adjusted annually by the School Board to account for measurable programmatic changes.

Policy VIII.2.2      The land development regulations of the Town shall contain provisions which require that public facilities which serve such development have a capacity which meets or exceeds the adopted level of service standard at the time the development permit is issued.

OBJECTIVE VIII.3    The Town shall, by 1992, include subdivision improvement standards within the land development regulations which, where required by such regulations, the subdivider shall provide paved streets, install sidewalks, street name signs, street lights, fire hydrants, curbs and gutters, install water mains and stormwater facilities.

Policy VIII.3.1      The land development regulations of the Town shall require that all proposed subdivisions which include an existing street shall be required to improve the street to conform to the standards established within the land development regulations.

- OBJECTIVE VIII.4 The Town, by 1991, shall establish a capital improvements budgeting process to manage the fiscal resources of the Town, so that needed capital improvements, identified within the Comprehensive Plan, are provided for existing and future development and re-development.
- Policy VIII.4.1 The Town shall incorporate within the annual budgeting process of the Town, a capital improvements budget which addresses the needed projects found in the schedule of improvements and funding of this plan element.
- Policy VIII.4.2 The land development regulations of the Town shall limit the issuance of development permits to areas where the adopted level of service standards for the provision of public facilities found within the Comprehensive Plan are maintained. This provision shall also include areas where development orders were issued prior to the adoption of the Comprehensive Plan.
- Policy VIII.4.3 The Town shall establish a policy as part of the annual capital improvements budgeting process to issue revenue bonds only when the maximum total of the annual payment for all revenue bonds does not exceed 20 percent of the Town's annual non-ad valorem operating revenues.
- Policy VIII.4.4 The Town shall establish a policy as part of the annual capital improvements budgeting process to request issuance of general obligation bonds only when the maximum general obligation bonding capacity does not exceed 20 percent of the property tax base.
- Policy VIII.4.5 The Town shall apply for federal or state grant funding for projects which recognize the policies of other elements for this comprehensive plan whenever available and where it has been determined that the Town has competitive standing in any ranking process for determining program award.
- Policy VIII.4.6 The Town shall limit the extension of the service area of new public facilities owned and operated by the Town to the adjacent designated urban development area as defined within the Comprehensive Plan of the County.
- Policy VIII.4.7 The Town shall replace or renew community facility plants damaged due to storm surge or flood only where such facility can meet minimum requirements for flood proofing.
- Policy VIII.4.8 The Town shall, as part of its annual budgeting process, adopt an annual capital improvements project budget.
- OBJECTIVE VIII.5 The Town shall assess new developments pro-rate share of the costs necessary to finance public facility improvements necessitated by development in order to adequately maintain adopted level of service standards.

IMPLEMENTATION

FIVE YEAR SCHEDULE OF IMPROVEMENTS

The five year schedule of improvements shown in Table VIII-1 is the implementation mechanism of the Capital Improvement Element to stage the timing, location, projected cost, and revenue sources of any capital improvement needs identified within the other elements of the Comprehensive Plan. The following schedule documents the economic feasibility of the Town Comprehensive Plan and is based upon the Data and Analysis Report, which although not a part of this plan, provides the foundation for the determination of the economic feasibility of any projects listed.

TABLE VIII-1  
FIVE YEAR SCHEDULE OF IMPROVEMENTS

2010 -2014

PROJECT DESCRIPTION	SCHEDULE	PROJECTED COST	GENERAL LOCATION	REVENUE SOURCE	CONSISTENCY WITH OTHER ELEMENT
Playground Equipment	FY 2010	\$80,000	Recreational Park	FRDAP	YES
Pavilions	FY 2010	\$50,000	Recreational Park	FRDAP	YES
Restroom	FY 2010	\$50,000	Recreational Park	FRDAP	YES
Ballfield Lighting	FY 2010	\$20,000	Recreational Park	FRDAP	YES
Walking Trail/Covered Bridge	FY 2010	\$10,000	Recreational Park	FRDAP	YES
Ballfield Improvements	FY 2010	\$10,000	Recreational Park	FRDAP	YES
Water Line Replacement	FY 2010	\$500,000	Water Dept.	CDBG	YES
Replace Water Pumps at Well	FY 2012	\$40,000	Water Dept.	Grants	YES
Fire Station	FY 2012	\$300,000	Fire Dept.	Grants	YES

Note: FRDAP means Florida Recreation Development Assistance Program. CDBG means Community Development Block Grant

Source: Data and Analysis Report, 1989, and revised 2008, and 2009.

PROCEDURE FOR MONITORING AND  
EVALUATION OF CAPITAL IMPROVEMENTS ELEMENT

The role of monitoring and evaluation of the Capital Improvements Element is important to the effectiveness of the Town's planning program. This is due to the fluctuations in the revenues and expenditures of the Town due to market and economic conditions.

The revenues and expenditures of the Town will be used to predict fiscal trends in order to maintain the Town's adopted level of service standards for public facilities and recreation. Therefore, the Capital Improvements Element requires a continuous program for monitoring and evaluation, and pursuant to Chapter 163, Part II, Florida Statutes, this element will be reviewed on an annual basis to ensure that the fiscal resources are available to provide the public facilities needed to support the established level of service standards.

The annual review is the responsibility of the Town's Local Planning Agency. Town staff, designated by the Town Manager will serve as advisory counsel to the Local Planning Agency dealing with all fiscal issues.

The Local Planning Agency shall consider the following points during the annual review to assist in the determination of findings and recommendations to the Town Council:

1. The review of the criteria used to evaluate capital improvement projects in order to ensure that projects are being ranked in their appropriate order of priority;
2. The Town's effectiveness in maintaining the adopted level of service standards;
3. The impacts of service provisions of other local, regional or state agencies upon the Town's ability to maintain the adopted level of service standards;
4. Efforts by the Town to secure grants or private funds, whenever available, to finance the provision of needed capital improvements;
5. The consideration of any corrections, updates and modifications concerning costs, and revenue sources;
6. The consistency of the Capital Improvements Element with the other elements of the Comprehensive Plan and most particularly its support of the Future Land Use Element;
7. The Town's ability to provide public facilities within respective geographic service areas in order to determine any need for boundary modification or adjustment; and
8. The appropriateness of including within the 5-Year Schedule of Improvements those identified improvements needed for the latter part of the planning period.

The findings and recommendations of the Local Planning Agency will be transmitted to the Town for review at a scheduled public hearing. Subsequent to review of the findings and recommendations of the Local Planning Agency, the Town Council shall direct Town staff to provide the Local Planning Agency with an updated 5-Year schedule of Improvements and any drafts for amendments to the Capital Improvements Element as deemed necessary by the Town Council.

The Local Planning Agency shall consider the annual amendment of the 5-Year Schedule of Improvements at the first scheduled date for consideration of amendments to the Town's Comprehensive Plan. All amendments to the Schedule or elements except for corrections, updates, and modifications concerning costs; revenue sources; acceptance of facilities pursuant to dedications which are consistent with the plan; or the date of construction of any facility enumerated in this Capital Improvements Element, shall be adopted in accordance with Chapter 163.3187, Florida Statutes, as amended.

PROCEDURE FOR PREPARATION  
OF AN EVALUATION AND ANALYSIS REPORT

The Town shall prepare an evaluation and appraisal report every five (5) years as is required by law. The purpose of that report is to advise the Town of the progress made towards compliance with the Comprehensive Plan, and to evaluate, update and otherwise revise that data and information used in the preparation of the Comprehensive Plan. The evaluation and monitoring of the overall Comprehensive Plan is important to the effectiveness of the Town's overall planning program.

The evaluation and appraisal report shall be prepared by the Town's Local Planning Agency. In the preparation of said report, the Local Planning Agency shall consider, at a minimum; the following:

- A. Citizen Participation: The Local Planning Agency shall encourage citizen participation in the preparation of the evaluation and appraisal report. Those rules and regulations adopted for purposes of the Comprehensive Plan shall be used as the rules and regulations governing citizen participation in the preparation of the Evaluation and Appraisal Report.
- B. Baseline Data: The Local Planning Agency shall revise the Data and Analysis used in the preparation of the Comprehensive Plan and shall revise, correct, modify or otherwise amend those items that so require.
- C. Goals, Objectives and Policies: The LPA shall review the goals, objectives and policies as stated in the Comprehensive Plan and as to such goals, objectives and policies, shall:
  - 1. Identify those goals, objectives and policies which were met or exceed during the five (5) year review period: identify any specific circumstances or events that lead to the achievement and
  - 2. Identify those goals, objectives and policies not met or exceeded during the five (5) year review period; identify problems that arose; identify specific obstacles to achievement.

CONCURRENCY MANAGEMENT SYSTEM

Chapter 9J-5, Florida Administrative Code requires the adoption of a concurrency management system to ensure that facilities and services needed to support development are available concurrent with the impacts of such development. This concurrency management system is designed to ensure that prior to the issuance of a development order and development permit that the adopted level of service standards required within this Comprehensive Plan for roads, potable water, sanitary sewer, solid waste, drainage and recreation and open space will be maintained.

The Town has adopted policies within this Comprehensive Plan, which establish level of service standards for public facilities; the concurrency management system in turn provides a mechanism for which the Town can ensure the maintenance of the standards concurrent with the impacts of development.

The minimum requirements for concurrency within this management system are as follows:

- 1. For roads, potable water, sewer, solid waste, drainage and recreation and open space, at a minimum, provisions which ensure that:
  - a. The necessary facilities and services are in place at the time a development permit is issued; or
  - b. A development permit is issued subject to the condition that the necessary facilities and services will be in place when the impacts of the development occur; or
  - c. The necessary facilities are under construction at the time a permit is issued; or

- d. The necessary facilities and services are guaranteed in an enforceable development agreement that includes the provisions of Chapter 9J-5.0055 (2)(a)(1-3), Florida Administrative Code, as amended. An enforceable development agreement may include, but is not limited to development agreements pursuant to Chapter 163.3220, Florida Statutes, as amended or an agreement or development order issued pursuant to Chapter 380, Florida Statutes.

These minimum requirements shall be ensured as follows:

1. **Building Permits.** The issuance of a building permit has more of an immediate impact on the level of service for public facilities than may be the case with the issuance of other types of development orders. Therefore, building permits shall be issued only when the necessary facilities and services are in place.

The determination of the existence of the necessary facilities and services in place shall be made by using the estimates made by the Local Planning Agency as part of their most recent monitoring and evaluation of the Capital Improvements Element. Such determination shall be made by the Zoning Administrator as part of the Certificate of Zoning Compliance procedure.

2. For roads, this determination shall apply to the adopted level of service standards for all roadway segments impacted by the proposed development.
3. In making such determination, the Zoning Administrator shall reserve that capacity required to serve previously approved/vested development and proposed developments following approval of a development order or permit. If the proposed development requires an amendment to the 5-Year Schedule and plan, then said amendment must be completed prior to the issuance of a development permit or order.
4. **Other Types of Development Orders.** Other types of development orders include, but are not limited to approval of subdivisions, re-zoning, special permits and site plan approval. These other types of development orders have less immediate impacts on public facilities and services than the issuance of a building permit. Therefore, subject to the Local Planning Agency determining that the necessary facilities or services are in place and are maintaining the adopted level of service, the following concurrency management requirements shall apply for the issuance of such development orders.
  - a. Provisions shall be included within the development order which shall require the construction of additional public facility capacity, where public facilities, due to the impacts of the development proposal do not meet the adopted level of service; or
  - b. To require the necessary public facilities be constructed by the developer and at the developer's expense, or by the public or private entity having jurisdictional authority over the facility to the level of service identified and within conformance with the 5-Year Schedule of Improvements found within the Capital Improvements Element of the Town.

In such cases where there are competing applications for public facility capacity, the following order of priority shall apply:

1. Issuance of a building permit based upon previously approved development orders permitting redevelopment;
2. Issuance of a building permit based upon previously approved development orders permitting new development;
3. Issuance of new development orders permitting redevelopment;
4. Issuance of new development orders permitting new development.

In conclusion, the following conditions apply to the Town's concurrency management system:

1. Amendments to the Comprehensive Plan can be made twice each year and as otherwise permitted as small scale developments. In addition, changes can be made to the Capital Improvements Element by ordinance if the changes are limited to the technical matters listed in Chapter 163, Part II, Florida Statutes.
2. No development order shall be issued which would require the Town Council to delay or suspend construction of any of the capital improvements on the 5-Year schedule of the Capital Improvements Element.
3. If by issuance of a development order a substitution of a comparable project on the 5-Year schedule is proposed, the applicant may request the Town to consider an amendment to the 5-Year schedule in one of the twice annual amendment reviews.
4. The result of any development not meeting adopted level of service standards for public facilities shall be cessation of the affected development or the reduction of the standard for level of service (which requires an amendment to the Comprehensive Plan).
5. For the purposes of this section, the latest point in the application process for the determination of concurrency is prior to the approval of an application for a development order or permit which contains a specific plan for development, including densities and intensities of development.

# IX

## PUBLIC SCHOOL FACILITIES ELEMENT

THIS PAGE LEFT BLANK INTENTIONALLY

## **IX**

### **PUBLIC SCHOOL FACILITIES ELEMENT**

#### **INTRODUCTION**

The School Facilities Element designates evaluation standards and methodologies for determining proportionate share mitigation for school capacity and future land development in the Town. The purpose of this School Facilities Element is to ensure that a public school concurrency system is based upon consistent goals, objectives and policies using appropriate and relevant best available data in compliance with the requirements of Section 163.3177(12), Florida Statutes. In accordance with this requirement, a uniform system of level of service standards, implementation requirements and proportionate share mitigation are established in this Public School Facilities Element. The data collected for this plan element and analysis of this data, contained in the Town's Data and Analysis document, are not part of this plan element, but serve to provide a foundation and basis for the formulation of this Public School Facilities Element of the Comprehensive Plan.

The following goals and objectives provide for correction of existing deficiencies, ensure adequate school capacity for the five-year and long term planning periods, coordinate school location with residential development, ensure necessary supporting infrastructure, include options for proportionate-share mitigation and provide procedures for school site selection. An interlocal agreement between the Town and the School Board allows for both the private and public sectors to feasibly plan for the logical provision of needed school facilities and services to the students of the Town.

The following policies list the level of service standards for the Town in conjunction with the Five-Year Schedule of Capital Improvements of the Capital Improvements Element of this Comprehensive Plan. A concurrency service area is established on a districtwide basis along with service requirements. School capacity is determined by using the Florida Inventory of School Houses Capacity and is incorporated into considerations of future site development and school design. A process to implement school concurrency by providing capacity determination, availability standards, applicability standards, and proportionate-share mitigation outlines the procedures for evaluating the mitigation process concerning the effect that proposed developments may have on school capacity.

#### **GOALS, OBJECTIVES AND POLICIES**

**GOAL IX.1 - IT IS THE GOAL OF THE TOWN TO PROVIDE FOR THE FUTURE AVAILABILITY OF PUBLIC SCHOOL FACILITIES IN A MANNER CONSISTENT WITH ADOPTED LEVEL OF SERVICE STANDARDS. THIS GOAL SHALL BE ACCOMPLISHED IN ORDER TO PROVIDE ADEQUATE SCHOOL FACILITY CAPACITY, AS DETERMINED BY THE LEVEL OF SERVICE, ON A COUNTY-WIDE BASIS. THE IMPLEMENTATION OF SCHOOL CONCURRENCY WILL BE ACCOMPLISHED BY ADHERING TO AND RECOGNIZING THE TOWN'S AUTHORITY IN LAND-USE DECISIONS, WHICH INCLUDE THE AUTHORITY TO APPROVE OR DENY COMPREHENSIVE PLAN AMENDMENTS, REZONINGS, OR OTHER DEVELOPMENT ORDERS THAT GENERATE STUDENTS AND IMPACT THE SCHOOL SYSTEM; AND THE SCHOOL BOARD'S STATUTORY AND CONSTITUTIONAL RESPONSIBILITY TO PROVIDE ADEQUATE PUBLIC SCHOOLS.**

**OBJECTIVE IX.1**      Establish level of service standards in order to ensure that there is sufficient school capacity to support student growth for each year of the five-year planning period and for the long term planning horizon.

**Policy IX.1.1**      The level of service is defined as school enrollment as a percentage of school student capacity based upon the Florida Inventory of School Houses. The level of service standard is the maximum level of school utilization that will be permitted in the School District. The level of service is established for schools in the Town, as follows:

1. Elementary: 100 percent of permanent Florida Inventory of School Houses capacity as adjusted annually by the School Board to account for measurable programmatic changes;
2. Elementary/Middle: 100 percent of permanent Florida Inventory of School Houses capacity as adjusted annually by the School Board to account for measurable programmatic changes;
3. Middle: 100 percent of permanent Florida Inventory of School Houses capacity as adjusted annually by the School Board to account for measurable programmatic changes;
4. High: 100 percent of permanent Florida Inventory of School Houses capacity as adjusted annually by the School Board to account for measurable programmatic changes.

Policy IX.1.2 The adopted level of service standards shall become applicable commensurate with the adoption of this element of the Comprehensive Plan.

Policy IX.1.3 Individual schools should generally not operate in excess of the established level of service. Moreover, the issuance of final development orders for subdivision plats or site plans shall be strictly conditioned upon the availability of school capacity and the maintenance of the adopted level of service on a districtwide basis.

Policy IX.1.4 The level of service standards will be used to determine whether sufficient school capacity exists to accommodate future development projects, and evaluate the sufficiency of the Five-Year Schedule of Capital Improvements of the Capital Improvements Element. The Five-Year Schedule of Capital Improvements of the Capital Improvements Element shall be reviewed, updated and adopted annually thus ensuring that projects necessary to address existing deficiencies, and to meet future needs based upon the adopted level of service standards, are scheduled accordingly.

Policy IX.1.5 An annual Comprehensive Plan amendment shall include the addition of a new fifth year to the Five-Year Schedule of Capital Improvements of the Capital Improvements Element based upon the School District's financially feasible public schools facilities capital program and five-year facilities work plan. The School District shall provide to the Town an updated five-year district facilities work plan no later than October 1 of each year and the Town shall adopt the level of service capacity projects listed in the updated five-year district facilities work plan into the Capital Improvements Element no later than December 1 of each year. The annual plan amendment shall ensure the Five-Year Schedule of Capital Improvements of the Capital Improvements Element continues to be financially feasible and the level of service standards continue to be achieved and maintained.

Policy IX.1.6 The Town shall review the Public School Facilities Element annually for potential amendments. Any potential amendments to the adopted level of service standards shall be considered annually, but no later than the second amendment cycle. The Initiating Party shall provide a memorandum to all involved parties - the School Board, County, and Municipalities - that includes a description of the proposed amendment, a statement concerning the impact of the proposed amendment on the Comprehensive Plan, and supporting data and analysis that demonstrates that the amendment is financially feasible and can be achieved and maintained over the five years of the School District's financially

feasible public school facilities capital program. If there is consensus among all parties to amend the Public School Facilities Element, it shall be accomplished through an amendment to the Interlocal Agreement for Public School Facility Planning and the adoption of amendments to the Comprehensive Plan. The amendment shall not be effective until the amended Interlocal Agreement for Public School Facility Planning is fully executed by all parties and Comprehensive Plan amendments are adopted and found compliant.

OBJECTIVE IX.2 Establish the school concurrency service area as the entire school district within which a determination can be made as to whether there is adequate school capacity available based on the adopted level of service standards. The concurrency service area shall maximize capacity utilization, taking into account transportation costs, limiting maximum student travel times, the effect of court-approved desegregation plans, achieving social economic, racial and cultural diversity objectives, and other relevant factors as determined by the School Board's policy on maximization of capacity. Other considerations for amending concurrency service areas may include safe access (including factors such as the presence of sidewalks, bicycle paths, turn lanes and signalization, and general walkability), diversity and geographic or man-made constraints to travel. The types of adjustments to school operations that will be considered shall be determined by the School Board's policies on maximization of capacity.

Policy IX.2.1 The Town shall demonstrate that adopted level of service standards will be achieved and maintained on a districtwide basis within the period covered by the Five-Year Schedule of Capital Facilities Improvements and that the utilization of school capacity is maximized to the greatest extent possible, taking into account transportation costs and other relevant factors.

OBJECTIVE IX.3 Ensure that Comprehensive Plan amendments and other land use decisions are concurrently evaluated with school capacity availability within the concurrency service area.

Policy IX.3.1 The Town shall rely upon School Board findings and comments on the availability of school capacity when considering the decision to approve Comprehensive Plan amendments and other land use decisions as provided for in Section 163.3177 (6)(a), Florida Statutes.

Policy IX.3.2 The Town shall identify methods to direct development to areas with adequate school capacity or where school sites adequate to serve potential growth have been donated to or set aside for purchase by the School Board in written agreements approved by the School Board.

Policy IX.3.3 In any instance where capacity will not be available to serve students to be generated by a development seeking approval and proportionate share mitigation is not an option, the school capacity deficiency will result in the denial of the proposal.

Policy IX.3.4 The School Board shall review potential new development student generation impacts and available school capacity. Where capacity will not be available to serve students generated by a proposed development and proportionate share mitigation is not an option, the School Board shall not issue a favorable concurrency determination. The Town shall use lack of school capacity demonstrated by an unfavorable concurrency determination as a reason for denial.

- OBJECTIVE IX.4 Ensure that the planning and construction of educational facilities are coordinated so that the timing is appropriate and the selected location is compatible with the surrounding area, concurrent with necessary service and infrastructure, and consistent with the Comprehensive Plan.
- Policy IX.4.1 The Town and School Board will jointly determine the need for and timing of on-site and off-site improvements (including water, sanitary sewer, roads and drainage) necessary to support each new school or the proposed renovation, expansion or closure of an existing school as provided for in the Interlocal Agreement for Public School Facilities Planning and will enter into a written agreement as to the timing, location, and the party or parties responsible for constructing, operating and maintaining the required improvements. The Town shall coordinate with the School Board so that proposed public school facility sites are consistent with the applicable land use designations and policies of the Comprehensive Plan, as well as the land development regulations of the applicable zoning districts. Pursuant to Section 1013.193, Florida Statutes, the Town will consider each public school facility site plan as it relates to environmental concerns, health, safety and welfare, and effects on adjacent property. In addition, road capacity and traffic concerns will also be evaluated. The Town will also continue to pursue the development of mutually acceptable guidelines for the selection of future school sites including, but not limited to:
1. Acquisition of school sites which allow for future expansions to accommodate future enrollment and other facility needs deemed beneficial for joint-uses, as identified by the School Board and the Town;
  2. Coordination of the location, phasing, and development of future school sites to ensure that site development occurs in conjunction with the provision of required infrastructure to serve the school facility; and
  3. Preferences for residential, urban areas with allowances for rural sites as deemed necessary and appropriate under certain circumstances.
- Policy IX.4.2 The Town shall coordinate with the School District to evaluate and locate potential sites where the co-location of public facilities, such as parks, libraries and community centers, with schools can be selected and developed by the Town and the School Board.
- OBJECTIVE IX.5 Enhance community design through effective school facility design and siting standards. Encourage the siting of school facilities so that they are compatible with the surrounding land use.
- Policy IX.5.1 The Town shall implement and maintain mechanisms designed to closely coordinate with the School Board long-range school facilities planning with the Future Land Use Map of the Comprehensive Plan and public school facilities programs, such as:
1. Greater efficiency for the School Board and the Town by the placement of schools to take advantage of existing and planned roads, water, sewer, parks and drainage systems;
  2. Improved student access and safety by coordinating the construction of new and expanded schools with road and sidewalk construction programs;
  3. The location and design of schools with parks, ball fields, libraries, and other community facilities to take advantage of shared use opportunities; and

4. The expansion and rehabilitation of existing schools to support neighborhoods.

Policy IX.5.2 The Town and School Board shall permit and encourage the joint-use of school sites and Town facilities with similar facility needs, such as libraries, parks and recreation facilities and health care facilities. Also, the School Board shall coordinate with the Town in the location, phasing and design of future school sites to enhance the potential of schools as recreation areas.

Policy IX.5.3 The Town and the School Board shall coordinate the location of public schools with the Future Land Use Map of the Comprehensive Plan to ensure existing and proposed school facilities are located consistent with the existing and proposed residential areas that schools serve, are approximate to appropriate existing and future land uses, and that schools serve as focal points within the community.

Policy IX.5.4 The Town and the School Board shall coordinate emergency preparedness issues including, but not limited to, the use of school facilities as public shelters during emergencies.

Policy IX.5.5 The School Board shall provide bicycle and pedestrian access consistent with Florida Statutes on public school property. Bicycle access and trails to public schools should be incorporated in trail projects and programs that are currently scheduled by the Town. The School Board shall provide parking and sidewalks on public school property in accordance with applicable land development regulations.

**GOAL IX.2 - IT IS THE GOAL OF THE TOWN TO ESTABLISH A PROCESS FOR THE IMPLEMENTATION OF SCHOOL CONCURRENCY BY PROVIDING FOR CAPACITY DETERMINATION STANDARDS, AVAILABILITY STANDARDS, APPLICABILITY STANDARDS AND PROPORTIONATE SHARE MITIGATION.**

**OBJECTIVE IX.6** Establish school capacity determination standards.

Policy IX.6.1 The School District shall determine whether adequate school capacity exists for a proposed development, based upon adopted level of service standards, concurrency service area and other standards stipulated in the Interlocal Agreement for Public School Facility Planning.

Policy IX.6.2 The School District shall conduct a concurrency review that includes findings and recommendations of whether there is adequate school capacity to accommodate the proposed development for each type of school within the concurrency service area consistent with the adopted level of service standards. The School District shall issue a concurrency determination based on the findings and recommendations.

**OBJECTIVE IX.7** Establish school availability standards.

Policy IX.7.1 The Town shall not deny a subdivision plat or site plan (or functional equivalent) for the failure to achieve and maintain the adopted level of service for public school capacity where:

1. Adequate school facilities will be in place or under actual construction within three years after the issuance of the final plat or site plan (or functional equivalent); or

2. The developer executes a legally binding commitment to provide mitigation proportionate to the demand for public school facilities to be created by the actual development of the property subject to the final plat or site plan (or functional equivalent).

Policy IX.7.2 If the School District determines that adequate capacity will not be in place or under actual construction within three years after the issuance of final plat or site plan approval and mitigation is not an acceptable alternative, the School District shall not issue a School Concurrency Determination. If the School District determines that adequate capacity does not exist, but mitigation, through proportionate share mitigation or some other means, the application will remain active pending the conclusion of the mitigation negotiation, as provided for within the Interlocal Agreement for Public School Facility Planning.

OBJECTIVE IX.8 Establish proportionate share mitigation alternatives which are financially feasible and will achieve and maintain the adopted level of service standards consistent with the School Board's financially feasible capital improvement program and five-year district facilities work plan.

Policy IX.8.1 In the event that mitigation is an acceptable alternative to offset the impacts of a proposed development, where the adopted level of service standards would otherwise be exceeded, the following options listed below, for which the School Board assumes operational responsibility through incorporation in the School Board's adopted financially feasible capital improvements program and five-year district facilities work plan and which will maintain the adopted level of service standards, shall include:

1. The contribution of land; or
2. The construction, expansion, or payment for land acquisition or construction of a public school facility; or
3. The creation of mitigation banking based on the construction of a public school facility in exchange for the right to sell capacity credits.

Policy IX.8.2 Proposed mitigation shall be directed toward a permanent capacity improvement identified in the School Board's financially feasible capital improvements program and five-year district facilities work plan. Consideration may be given by the School Board to place an additional improvement required for mitigation in its capital improvement program and five-year district facilities work plan. The proposed mitigation must satisfy the demand created by the proposed development consistent with the adopted level of service standards or identified as an amendment to the School Board's adopted capital improvement program and five-year district facilities work plan. Portable classrooms shall not be accepted as mitigation.

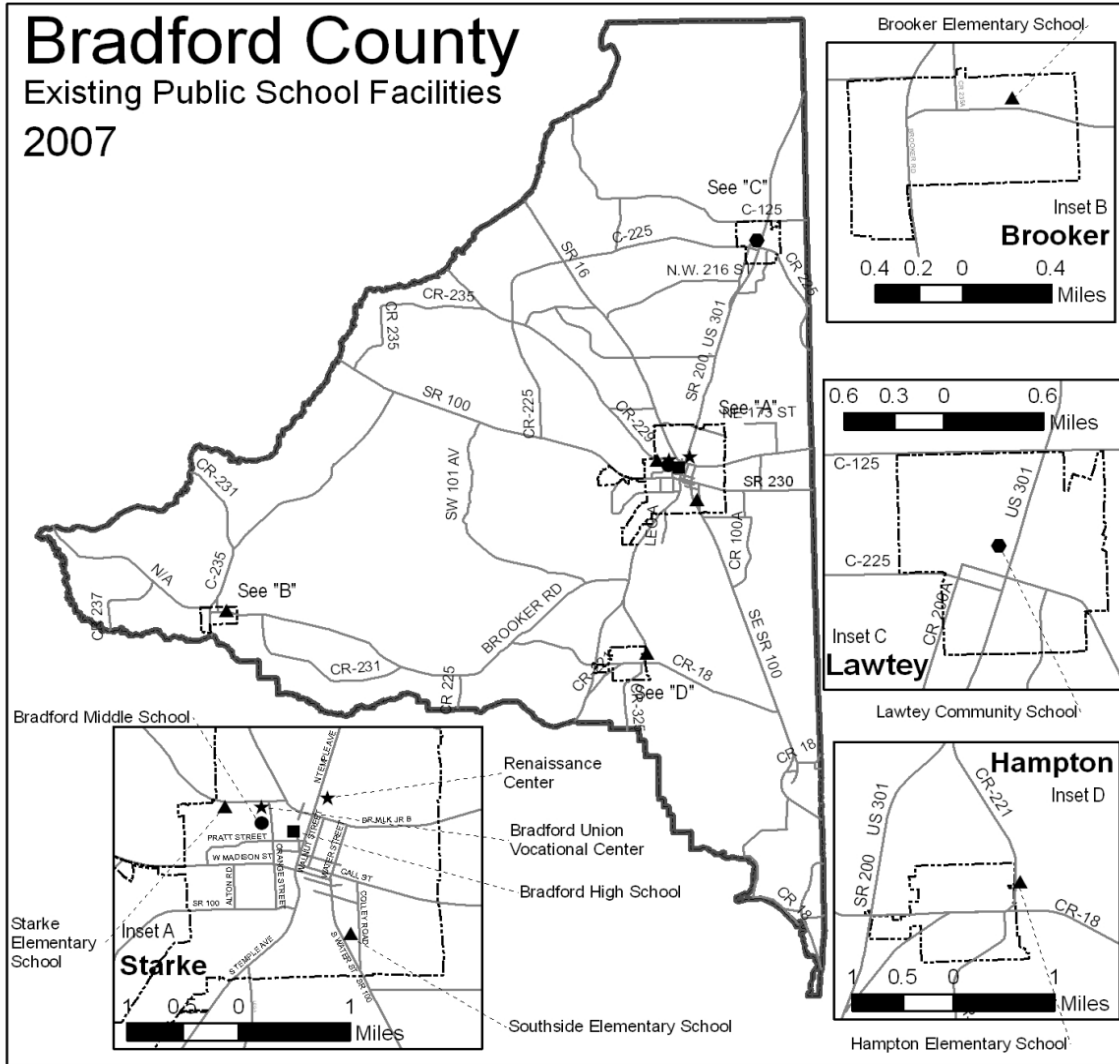

Policy IX.8.3 Mitigation shall be directed to projects on the School Board's adopted financially feasible capital improvements program and five-year district facilities work plan that the School Board agrees will satisfy the demand created by that development approval, and shall be assured by a legally binding development agreement between the School Board, the Town and the applicant executed prior to the issuance of the final plat approval, site plan approval, or functional equivalent. If the School Board agrees to the mitigation, the School Board must commit in the agreement to placing the improvement required for mitigation in its financially feasible capital improvement program and five-year district facilities work plan.

- Policy IX.8.4 The process to determine proportionate share mitigation shall be in accordance with the procedure outlined in the Interlocal Agreement for Public School Facility Planning. The applicant’s proportionate share mitigation obligation will be credited toward any other impact fee or exaction imposed by local ordinance for the same need, on a dollar-for-dollar basis, at fair market value.
- Policy IX.8.5 The School District shall annually review and update student generation multipliers for single-family, multi-family and mobile home housing types for elementary, middle and high schools based upon the best available district-specific data; cost per student estimates for elementary, middle and high schools that include all cost of providing instructional and core capacity including land, design, buildings, equipment and furniture, and site improvements while the cost of ancillary facilities that generally support the school district and the capital costs associated with the transportation of students shall not be included in the cost per student estimate used for proportionate share mitigation; capacity of each school, and current and reserved enrollment of each school in accordance with professionally accepted methodologies.
- Policy IX.8.6 The School District shall review and update student enrollment projections in accordance with professionally accepted methodologies on an annual basis.
- OBJECTIVE IX.9 Ensure that existing and planned public school facilities are coordinated with plans for supporting infrastructure and have safe access, including sidewalks, bicycle paths, turn lanes, and signalization.
- Policy IX.9.1 The Town shall maximize efficient use of existing and planned infrastructure by coordinating with the School District future school sites that take advantage of existing and planned roads, potable water, sanitary sewer, parks and drainage systems.
- Policy IX.9.2 The Town shall ensure safe student access to school sites by coordinating the construction of new residential developments, expansion of existing residential developments and redevelopment or revitalization of existing residential developments with safe road and sidewalk connections to public schools.
- Policy IX.9.3 The Town shall coordinate bicycle access to public schools by requiring new residential developments adjacent to existing and proposed school sites, other than age restricted residential developments, to include pedestrian connections between any sidewalk network within the residential development and adjacent school site.
- Policy IX.9.4 The Town shall work with the School Board to determine responsibility for the costs and construction of any needed offsite improvements for new public school facilities, such as signalization, installation of deceleration lanes, roadway striping for crosswalks, safe directional/warning signage and installation of sidewalks.

## APPENDIX B

### DEFINITIONS

**CAPACITY:** “Capacity” as defined by the Florida Inventory of School Houses Manual.

**CLASSROOM:** An instructional space requiring no special design or equipment and used for housing general programs such as language arts, social studies and mathematics.

**EDUCATIONAL FACILITIES:** The buildings and equipment, structures, and special educational use areas that are built, installed or established to serve educational purposes only.

**EDUCATIONAL PLANT:** The educational facility, site and site improvements necessary to accommodate students, faculty, administrators, staff and the activities of the educational program assigned to the administrative control of one person and uniquely identified in an educational plant survey.

**EDUCATIONAL PLANT SURVEY:** A systematic study of educational and ancillary plants and the determination of future needs to provide appropriate educational programs and services for each student.

**FIVE-YEAR DISTRICT FACILITIES WORK PLAN:** A plan which demonstrates the ability to finance capital improvements from existing revenue sources and funding mechanisms to correct deficiencies and meet future needs based on achieving and maintaining the adopted level of service for each year of the five year planning period for all schools of each type in each concurrency service area, and for the long range planning period.

**FLORIDA INVENTORY OF SCHOOL HOUSES:** An official inventory, which is based on design codes, of all district owned facilities.

**LEVEL OF SERVICE:** The measure of the utilization, expressed as a percentage, which is the result of comparing the number of students with the satisfactory Florida Inventory of School Houses capacity at a given location.

**LONG-RANGE PLANNING:** A process of devising a systematic method based on educational information and needs, carefully analyzed, to provide the facilities to meet the goals and objectives of the educational agency.

**MITIGATION OPTIONS:** The provision by an applicant of any combination of land, construction, expansion and payment for land acquisition or construction of a public school facility; or the creation of mitigation banking based on the construction of a public school facility in exchange for the right to sell capacity credits. Fair market value of the proportionate fair-share mitigation shall not differ based on the form of mitigation. Such options must include execution by the applicant and the local government of a binding development agreement that constitutes a legally binding commitment to pay proportionate-share mitigation for the additional residential units approved by the local government in a development order and actually developed on the property, taking into account residential density allowed on the property prior to the development that increased overall residential density. The School Board shall be a party to such an agreement.

**PERMANENT:** A structure built with a fixed foundation that has permanently attached walls, roof and floor that cannot be moved or transported either as a unit or in sections.

**PERMANENT STUDENT STATION:** The floor area in a public school facility required to house a student in an instructional program.

**PORTABLE CLASSROOM:** A classroom within a building or portion of a building made up of prefabricated units that may be disassembled and reassembled frequently, or a single unit of construction consisting of walls, roof and floor that is moveable as a unit either on wheels or by truck.

**PROPORTIONATE SHARE MITIGATION:** The contribution by a developer or applicant, through any of various means (see definition of Mitigation Options), of resources sufficient to offset or compensate for the site-specific impacts generated by a development. The fair market value of mitigation is credited against any impact fees or other exactions levied against the development.

**SITE:** A space of ground occupied or to be occupied by an educational facility or program.

**SITE DEVELOPMENT:** Site development means work that must be performed on an unimproved site in order to make it usable for the desired purpose; or, work incidental to new construction or to make an addition usable.

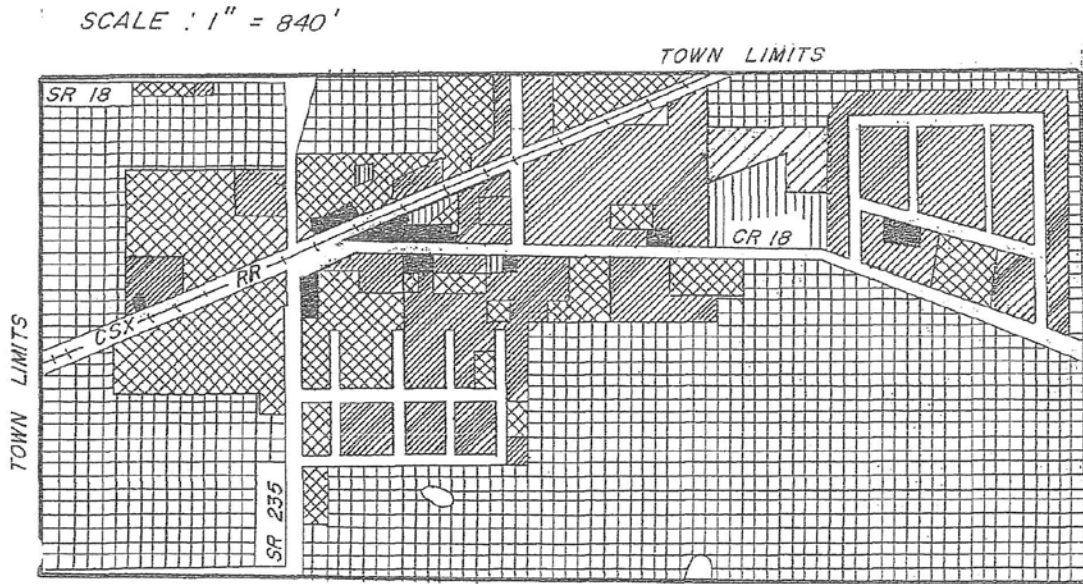

**SITE IMPROVEMENT:** The work that must be performed on an existing site to improve its utilization, correct health and safety deficiencies, meet special program needs or provide additional service areas. Site improvement incident to construction is the work that must be performed on a site as an accompaniment to the construction of an addition to an educational facility for a modernization project.

ILLUSTRATION A-VIII  
SOIL TYPES

Prepared September 30, 1989

LEGEND FOR ILLUSTRATION A-VIII  
SOIL TYPES

KEY NUMBER <sup>a</sup>	SOIL TYPES	CHARACTERISTICS
1	Hurricane Fine Sand	Somewhat poorly drained, sandy soils that formed in thick sandy marine sediments. They occur on nearly level landscapes and have thick subsurface layers which cover layers of organic coated sand. (13) <sup>b</sup>
2	Pottsburg Fine Sand	Poorly drained nearly level soils that occur on nearly level landscapes. These soils have fine sand surface layers which cover more layers of fine sand. (15) <sup>b</sup>
3	Foxworth Fine Sand	Moderately well drained nearly level to sloping soils. The surface layer and subsurface layers are sand. (16) <sup>b</sup>
4	Blanton Fine Sand (0 to 5 percent slopes)	Moderately well drained nearly level to strongly sloping soils. The surface layer is fine sand. The subsurface layer is divided into layers of sand. The subsoil is sandy loam and below this is sandy clay loam. (17) <sup>b</sup>
5	Lakeland Fine Sand	Excessively drained nearly level to steep soils. The surface layer and subsurface layers are sand. (18) <sup>b</sup>
6	Goldhead Variant Fine Sand	Poorly drained soil. Typically, the surface layer is fine sand. The subsurface layer is fine sand and the subsoil is fine sandy loam and sandy clay loam. Below the subsoil is fine sand. (34) <sup>b</sup>
7	Blanton Fine Sand (5 to 12 percent slopes)	Moderately well drained nearly level to strongly sloping soils. The surface layer is fine sand and the subsurface layer is subdivided into layers of sand. The subsoil is sandy loam. Below the subsoil is sandy clay loam. (39) <sup>b</sup>

<sup>a</sup> Numbers refer to those areas on Illustration A-VIII covered by that soil type.

<sup>b</sup> Bradford County Soil Type reference number.
