B. Quarterly Financial Report - March 31, 2004

Mr. Justice reported that the overall expenditure pattern for the operation of the Council for the past six months is on target when compared to the budgeted figures. He stated that only two program areas appear to have significant differences between budget and expenditures. He stated that “Local Technical Assistance” programs have only expended 42.7 percent of the budget, however this situation should change as a result of increased activity in both CDBG administration activities and local comprehensive planning work during the balance of the year. He reported that the other apparent significant under-expenditure is in the “Program Development” area and it is hoped that several thousand dollars will be unexpended at the end of the fiscal year to restore the level of the unencumbered fund balance. Mr. Justice reported that the overall
financial condition of the Council is sound and that the fund balance should remain unchanged at the end of the year.
