Introduction

A. Unified Planning Work Program - Defined

The Fiscal Years 2018-19 and 2019-20 Unified Planning Work Program for the Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area outlines and describes the planning efforts to be undertaken by participating agencies to maintain a comprehensive, cooperative and continuing transportation planning program in the Gainesville Metropolitan Area. The Gainesville Metropolitan Area is comprised of the Year 2010 United States Census Gainesville Urbanized Area and a transitioning area that extends to the City of Gainesville Urban Reserve Boundary. The Gainesville Urbanized Area includes a major portion of the City of Gainesville, a small portion of the City of Alachua and contiguous urbanized portions of unincorporated Alachua County. The transitioning area includes portions of unincorporated Alachua County and the City of Gainesville within the City of Gainesville Urban Reserve Boundary. Illustration I shows the Gainesville Metropolitan Area.

This Unified Planning Work Program has been prepared to define the tasks and anticipated funding requirements of the Gainesville Metropolitan Area transportation planning process for Fiscal Year 2018-19 and Fiscal Year 2019-20. This document serves to inform the public and all public officials and agencies, who contribute manpower and allocate funds to the transportation planning process, about all of the transportation planning tasks currently being conducted in the Gainesville Metropolitan Area. In addition, the Unified Planning Work Program provides the basis for federal funding of transportation planning activities identified in the document.

Transportation planning in the Gainesville Metropolitan Area is currently guided by a long-range transportation plan using input from public officials, technical experts and local citizens. State and federal governments participate in this planning process through the Florida Department of Transportation, the Federal Highway Administration, the Federal Aviation Administration and the Federal Transit Administration. The metropolitan area transportation planning process is administered by the Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area. Voting members of the Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area include the Gainesville Mayor and City Commissioners, and the Alachua County Commissioners. Non-voting members include the Florida Department of Transportation, the University of Florida and a Rural Advisor selected by the Alachua County League of Cities. The North Central Florida Regional Planning Council provides staff services pursuant to a professional staff services agreement to the Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area.

B. Overview of Local and Regional Comprehensive Transportation Planning Activities

Local and regional comprehensive transportation planning activities are currently underway in the Gainesville Metropolitan Area. Both the City of Gainesville and Alachua County have adopted comprehensive plans. In addition, the North Central Florida Regional Planning Council has an adopted strategic regional policy plan and the University of Florida has an adopted campus master plan. All of these plans are updated on a periodic basis. These local and regional planning programs are incorporated into the Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area planning program. This is primarily accomplished through the Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area Technical Advisory Committee. The City of Gainesville, Alachua County, Florida Department of Transportation, Gainesville/Alachua County Regional Airport Authority, School Board of Alachua County and University of Florida representatives are all members of this Committee.

In addition, this document was reviewed and approved by the Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area on April 23, 2018. These meetings were noticed and time was allocated for public comment. In addition, the draft Unified Planning Work Program was available on the Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area

website and available for comments to Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area during regular business hours between 8:00 a.m. to 5:00 p.m., Monday through Friday. All comments received from the public were considered and revisions were made where appropriate.

In addition, the Year 2045 Long-Range Transportation Plan will address this vehicle technology.

Appendix G includes descriptions of the federal and state planning emphasis areas and a matrix of tasks by planning emphasis areas to be addressed.

5. Title VI

The Unified Planning Work Program complies with the public involvement provisions of Title VI, which states: No person in the United States shall, on grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. Later in this document, the performance-based approach is used to identify measurable products for individual Unified Planning Work Program work tasks.

The Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area will implement the Fixing America's Surface Transportation Act performance measures and target setting requirements into its planning process and its long-range transportation plan and transportation improvement program. The Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area will coordinate with the Florida Department of Transportation regarding the establishment of performance measures and target setting.

This is in essence a “soft-match” provision that allows the federal share to be increased up to 100 percent to the extent credits are available. The soft match amount being utilized to match the Federal Highway Administration funding in the Unified Planning Work Program is 18.07 percent of Federal Highway Administration program funds for a total of \$213,846.

In addition to funding from the Federal Highway Administration, the Federal Transit Administration, the Florida Department of Transportation, Alachua County and the City of Gainesville, the Metropolitan Transportation Planning Organization for the Gainesville Urbanized Area includes State Soft Match and Local Inkind (locally-determined amount) contributions in calculating its overall budget that is reported in the Unified Planning Work Program. The overall budget includes soft match contributions from the Florida Department of Transportation and in-kind contributions provided by Alachua County and the City of Gainesville and the University of Florida. In-Kind contribution amounts are determined and provided by each jurisdiction. Exhibit 1 shows the soft match and in-kind amounts identified for each task.

Metropolitan Transportation Planning Organization (MTPO)

Dear Marlie:

The Florida Department of Transportation (FDOT) District Two staff has completed a review of the Metropolitan Transportation Planning Organization (MTPO) Title VI Non Discrimination Program.

The District Two liaison provided a copy of the MTPO Title VI Non Discrimination Program to the District Administrative Compliance Monitor, the State Title VI Monitor and the Federal Highway Administration (FHWA), Florida Division Civil Rights Program Coordinator. A compilation of all the comments were previously provided to you. We believe the final program document reflects consideration and inclusion of a great majority of the comments and considerations.

The District agrees the MTPO Title VI Non Discrimination Program is in compliance. We request you continue to improve upon and consider best practices for the MTPO adopted program as needed, based on the comments that have been provided in this comprehensive review. The Title VI Non Discrimination Program review is part of the reporting/review requirements outlined in FTA Circular 4702.1, "Title VI Program Guidelines for Federal Transit Administration Recipients." As a sub recipient of FTA funding, the MTPO program compliance report is submitted for review every three (3) years as stated in the Circular. If major changes occur to the Program during the interim years, please submit an update of the program for review.

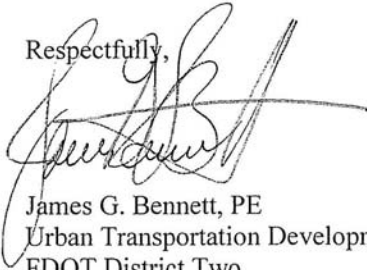

Thank you for your continued cooperation. Should you have any questions or need additional information, please contact me.

Planning Emphasis Areas

Appendix G: Planning Emphasis Areas

A. Federal Planning Emphasis Areas-2015

In 2015, the Federal Highway Administration reiterated its 2014 Planning Emphasis Areas- Moving Ahead for Progress in the 21st Century Act Implementation, Regional Models of Cooperation and Ladders of Opportunity. Moving Ahead for Progress in the 21st Century Act emphasis areas are also maintained in the Fixing America's Surface Transportation Act. Descriptions of these emphasis areas are as follows:

Fixing America's Surface Transportation Act Implementation

Transition to Performance-Based Planning and Programming -

- Further develop performance management approach to transportation planning and programming; work with local planning partner to implement performance-based planning provisions such as collecting performance data, selecting and reporting performance targets for the metropolitan area and reporting actual system performance related to those targets.
- Consideration of exploring the use of scenario planning to develop the metropolitan transportation plan.

Regional Models of Cooperation

Ensure a Regional Approach to Transportation Planning by Promoting Cooperation and Coordination across Transit Agency, Metropolitan Planning Organization and State Boundaries -

- Consideration of thinking beyond traditional borders and adopt a coordinated approach to transportation planning that supports common goals and capitalizes on opportunities related to project delivery, congestion management, safety freight livability and commerce across boundaries.
- Consideration of revisiting the metropolitan area planning agreements to ensure that there are effective processes for cross-jurisdictional communication among State Departments of transportation, Metropolitan planning Organizations and providers of public transportation to improve collaboration, policy implementation technology use and performance management.
- Consideration of exploring the opportunity to partner with Regional Planning Organizations to conduct transportation planning in nonmetropolitan areas.

Ladders of Opportunity

Access to Essential Services -

- Consideration of identifying transportation connectivity gaps is accessing essential services, such as employment, health care, schools/education, and recreation.
- Consideration of development and implementation of analytical methods to identify gaps in the connectivity of the transportation system.
- Consideration of development of infrastructure and operational solutions that provide the public, especially the traditionally underserved populations, with adequate access to essential services.

- Consideration of evaluation of effectiveness of public participation plans for engaging transportation disadvantaged communities in the transportation decision-making process.
- Consideration for updating the Section 5310 Coordinated Human Service Public Transportation Plans.
- Consideration for assessing the safety and condition of pedestrian and bicycle facilities.
- Consideration of evaluating compliance with the Americans with Disabilities Act, particularly around schools, concentrations of disadvantaged populations, social services, medical and transit facilities.

B. State Planning Emphasis Areas-2018

In 2018, the Florida Department of Transportation provided its Planning Emphasis Areas- Rural Transportation Planning, Transportation Performance Measures and ACES (Automated/Connected/Electric/Shared-Use) Vehicles. Descriptions of these emphasis areas are as follows:

Rural Transportation Planning

Moving Ahead for Progress in the 21st Century Act defined the structure and responsibilities of designated regional transportation planning organizations in federal regulations for the first time. Florida Statutes include several provisions that require coordination with local governments including those in rural areas. Some rural communities in Florida face significant development pressures and need transportation investments to handle growing populations and economic activities. Others simply struggle to maintain their existing transportation system and with providing services to a spread-out community. Metropolitan Planning Organizations are encouraged to plan for and coordinate with rural governmental entities both within their planning boundaries as well as those areas outside of the current boundaries that are impacted by transportation movements between regions.

Transportation Performance Measures

Federal Highway Administration has finalized six interrelated performance rules to implement the transportation performance measures framework established by Moving Ahead for Progress in the 21st Century Act and the Fixing America's Surface Transportation Act. Collectively, the rules address challenges facing the transportation system, including: improving safety, maintaining the condition of the infrastructure, reducing traffic congestions, improving the efficiency of the system and freight movement, protecting the environment, and reducing delays in project delivery. The rules established national performance measures. State Departments of Transportation and Metropolitan Planning Organizations must establish targets for each measure. Planning documents will identify the strategies and investments used to reach the targets. Progress towards meeting the targets will be reported through new and existing mechanisms. Metropolitan Planning Organizations need to account in their UPWP for the effort necessary to satisfy the federal requirements. As Metropolitan Planning Organizations and Florida Department of Transportation venture into this first round of target setting and adopting performance measures into our planning products, more emphasis will be placed on this topic area. The cooperative efforts of Florida's Metropolitan Planning Organizations and Department of Transportation to insure this new planning tool will be effective and well-coordinated will need to be shown in the upcoming Unified Planning Work Programs.

ACES (Automated/Connected/Electric/Shared-Use) Vehicles

According to the Federal Highway Administration, "Transportation is in the midst of disruptive change from new technologies (automated and connected vehicles); new institutions (shared mobility firms); and changing attitudes (reduced car ownership). Across the nation, transportation planners are under pressure to develop performance-oriented policies, plans, and investment decisions that consider an increasingly complex transportation landscape. In the process, planners need to consider, but cannot yet reliably predict, the potential impact of disruptive and transformational Connected Vehicle and Automated Vehicle technologies on safety, vehicle ownership, road capacity, vehicle miles travelled, land-use, roadway design, future investment demands, and economic development, among others. While some forms of Connected Vehicle and Automated Vehicle are already being deployed across the United States, significant unknowns exist regarding the rate of technology adoption, which types of technologies will prevail in the marketplace, the interaction between Connected Vehicle/Automated Vehicles and various forms of shared mobility services, and the impacts of interim and widespread levels of Connected Vehicle/Automated Vehicle usage."

Adopting and supporting innovative technologies and business practices supports all seven goals of the Florida Transportation Plan and the federal planning factors found in the Fixing America's Surface Transportation Act. Automated/Connected/Electric/Shared-Use Vehicles may lead to great improvements in safety, transportation choices, and quality of life for Floridians, our visitors and the Florida economy. Though there is a great deal of speculation and uncertainty of the potential impacts these technologies will have, Metropolitan Planning Organizations need to determine how best to address the challenges and opportunities presented to them by Automated/Connected/Electric/Shared-Use vehicles.
